

Meet Our Team: Keith Herbert, Senior Aquarist

Senior Aquarist Keith Herbert, who joined the Aquarium's Husbandry team last fall, is helping us gear up to open three new exhibits in April. Keith has played an integral role in new shark research programs lead by Aquarium of the Bay Foundation, including its sevengill shark tagging and tracking. In addition to his fascination with sharks and life below sea level, Herbert's passion for and experience working with reptiles and other land-dwelling animals is a perfect match with the much anticipated PG&E Bay Lab exhibit.

Keith has more than 20 years of professional experiences, including work with Sea World-Orlando, Disney's Living Seas in Florida, South Carolina Aquarium in Charleston, Coral World Ocean Park in the US Virgin Islands, and most recently Turtle Bay Exploration Park in Redding.

My work is my true passion, says Herbert.

Stay tuned for more information on the employees who make Aquarium of the Bay a truly unique nature center.
