ANNUAL REPORT 2022-2023

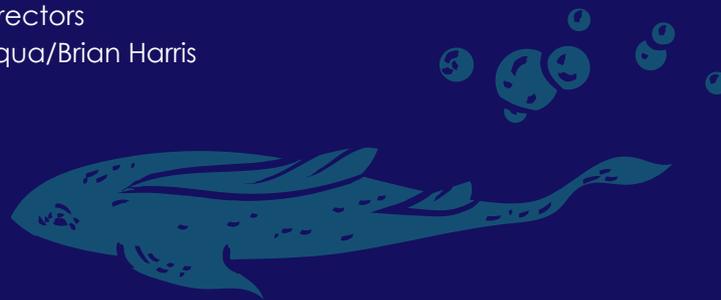

ACKNOWLEDGMENTS

We are grateful to our Donors, Patrons, Sponsors and Members who have continued to support our programs through the last 27 years of the Aquarium of the Bay and 42 years of environmental advocacy through the Bay Institute. We acknowledge the invaluable contribution of our wonderful staff for their dedication, care, and hard work in nurturing the 24,000 animals in our collections. Our Board of Directors have remained alert to the fiscal challenges and emergency measures that we proactively put in place in 2020-21 and continue to monitor. Our external partners and international collaborators have demonstrated great faith in our ability to deliver amid adversity and challenges, that has continued to strengthen our resolve and explore new solutions and opportunities. We are most grateful to our advisors and in-kind supporters for helping us stay the course on our mission. Our Veterinarian Dr. Jill Spangenberg DVM, Ph.D. deserves a special debt of gratitude for volunteering her time and lending her expertise to give us the best animal care that meets the highest standards of excellence. A big thank you to our volunteer divers, docents, and general volunteers for all your wonderful support.

"You have been at the helm of the Aquarium and Bay.Org for many years and especially, during its toughest period during Covid 19 shut-down which saw our challenges multiply with payroll, debt re-structure, re-financing negotiations and federal assistance. Despite its impact on your personal business, you provided unwavering leadership to Bay.Org and navigated the storm with a sense of higher societal purpose for which we are grateful."

Thank you and Farewell!

BAY.ORG WELCOMES NEW CHAIR

JON FISHER

Silicon Valley Entrepreneur and Philanthropist

We are delighted to welcome Silicon Valley entrepreneur and philanthropist Jon Fisher as the incoming Chair of Bay.Org. Winner of multiple awards for entrepreneurship, Jon sold his own NFTs before founding the software company ViciNFT, prior to building three companies including Bharosa—which produced the Oracle Adaptive Access Manager and sold to Oracle Corporation. An Adjunct Professor at University of San Francisco, he is the author of *Strategic Entrepreneurism: Shattering the Start-Up Entrepreneurial Myths* (2008) and is named on over 100 patents globally. Fisher has been a trustee of the Nueva School in Hillsborough, the Pacific Vascular Research Foundation in South San Francisco, and has served on the board of the Buck Institute For Age Research. An avid volunteer Diver and marine conservationist, he has supported the Aquarium's fund-raising efforts with his wife Darla and daughter Avery, during the most challenging Covid/ post-Covid years.

MESSAGE FROM CHAIR

December 14, 2023

Dear Friends of BayEcotarium:

During my long tenure on the board of bay.org, I have never seen such tremendous growth, expansion, innovation, research and creativity delivered by a lean workforce that continues to amaze on every front. The support of the community members and patrons has been vital to our survival. A permanent plaque was dedicated to the memory of Mike McGill whose family generously continue to support the capital expenses associated with the upkeep of Research Vessel Mike Reigle.

Just in the last fiscal year, the Aquarium has taken several decisive strides in securing its future with a clear strategy for debt elimination, infrastructural improvement, new exhibits and capital expansion, launching a soft campaign on December 6 at the historic UN COP28 Climate summit. The aquarium also raised the highest level of funds in its 27 year history, against all odds. Books, collaterals, annual reports, audited financial, taxes and every other operational aspect continues to be managed with professionalism. Enhanced internal efficiencies have positively impacted the external influence, presence and international outreach with projects pouring in from India, Botswana, Jamaica, Norway and elsewhere, in a clear testament to the potential of this organization to be an impactful voice for climate and ocean conservation.

The Bay Area attractions have struggled post-pandemic. But our inventive resilience has kept us afloat, as we look to a better future in times to come.

Donate generously! Wishing you a great New Year ahead!

Sincerely,

Ben Bleiman

Chair, Board of Directors, BayEcotarium
Commission President, San Francisco Entertainment Commission

MESSAGE FROM PRESIDENT & CEO

December 15, 2023

Dear Members, Patrons, and Friends:

2023 has been a year of tremendous opportunity and immense challenges.

While challenges largely stemmed from the continued downward trend in San Francisco tourism numbers that coat tailed on dwindling conferences, low cruise ship docking, the general concern with San Francisco's record on public safety, homelessness and vehicle break-ins along the embarcadero coupled with media coverage, the local museums, attractions, and destinations need a collective, cohesive, city-backed strategic initiatives with metrics of time-bound support to turn the tide. There has to be a sense of urgency and open communication for creating an ecosystem that can collectively improve tourism for many of these institutions still struggling with prolonged COVID closures and high operational costs of labor, inflation, insurance and talent retention.

In this context, the aquarium saw a steady stream of visitors, hosted events and parties, offered education and extension services, enhanced animal collections, offered an amazing array of retail merchandise and invested in facilities and life support system enhancements in conjunction with ongoing conservation initiatives on water policy, equity and endangered species.

We got renewed accreditation from AZA and became the first aquarium to receive twin provisional accreditation from UNCCD and UNFCCC leading up to our participation in the historic COP28 climate summit in Dubai where we hosted multiple Grammy winners and the legendary co-founder of the Police -Stewart Copeland.

The aquarium was tapped to design a Peace Park in New Jersey, an eco-theme Park in Meghalaya, an Oceanarium in Odisha and a Diamond museum in Botswana making it the only aquarium in the world involved in masterplanning and designing multiple mission- aligned projects around the globe.

We look forward to a transformational 2024. Happy New Year!

Stay connected. Stay tuned.

Dr. George Jacob FRCGS
President & CEO, BayEcotarium

EXECUTIVE SUMMARY

2023 has been a decisive year in the history of bay.org as it heralds a new era in its 43 year track record of environmental and ocean conservation in the San Francisco Bay Area. As we reflect on the rapid progress we have made on multiple fronts despite financial challenges and COVID debt carried forward, we saw tremendous improvements with much needed repairs and upgrades to facilities, exhibits, programs and life support systems. Holding areas, office floorings, storage, staff office refurbishments, signage, doors and fresh paint work, neglected for decades underwent a systemic refresh. Even as retail merchandise and wall graphics added vibrancy to the spaces in conjunction with cash counter claddings, a perky robot (Aquabot) continues to delight children with its animated enthusiasm while conducting gallery guided tours. Young Ocean Ambassador, 13 year-old Avery Fisher broke the Guinness Book of World Records by diving in our tunnels pulling off an amazing 36 underwater magic tricks in record time!

The Aquarium was re-accredited by the Association of Zoos and Aquariums after a rigorous

site and off-site review process. It also became the first Aquarium in the United States to receive twin provisional accreditations from 2 United Nations agencies- UNFCCC and UNCCD ratified at the UN COP28 Climate Summit held in Dubai (UAE). The Aquarium hosted a historic Climate Concert with multiple Grammy Winners at Dubai Opera with 2000 guests from around the world including 400 UN delegates and Ambassadors with Stewart Copeland, the legendary co-founder of The Police. A Climate Song recorded with the Royal Philharmonic Orchestra at Abbey Road Studios was dedicated the Blue Planet by the amazingly talented Boston-based singer Anuradha Jaju. Dr. Andrew Steer, President & CEO of Jeff Bezos Earth Fund delivered the Key-Note.

Our 2023 Annual Report is on schedule for a timely release for the seventh straight year with 2022 audited financials. As we bid adieu to our long-term Board Chair, Ben Bleiman, who led the organization for the last 7 years, we look forward to an exciting 2024 New Year ahead with renewed rigor and the launch of our Capital Campaign aligned with our 2025 Strategic Vision.

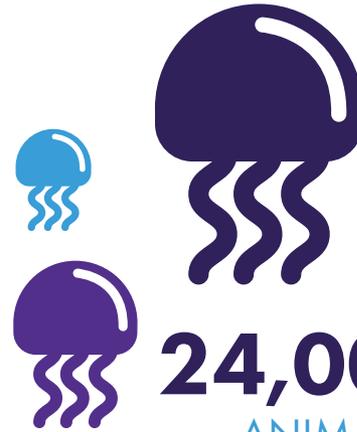

A stylized illustration of a blue whale, rendered in a darker shade of blue than the background. The whale is shown in profile, swimming towards the right. Its body is covered in a pattern of small, dark blue spots, representing its characteristic mottled skin. The whale's head is at the top left, and its tail is at the bottom right. The illustration is positioned behind the main text, adding a visual element related to the text's focus on ocean conservation.

ANIMAL CARE

Early this year, the Association of Zoos and Aquariums (AZA) conducted a rigorous examination of the Aquarium operations and safety standards and gave the aquarium its highest approval rating yet, with a five year re-accreditation certification. All departments pitched in to ensure that the aquarium facility and Life Support Systems adhere to the highest standards of professionalism. The final reviews were held in Oklahoma City and was attended by staff from Animal Care, Facilities, Guest Experiences, Operations, Human Resources and Executive Administration

Expanding Your Horizons Conference Key-note

Melissa Schouest, Director of Animal Care, delivered the Key-note address for the 40th annual Expanding Your Horizons Conference at Skyline College - a conference for 6th-12th grade young women to learn about career opportunities in math and science.

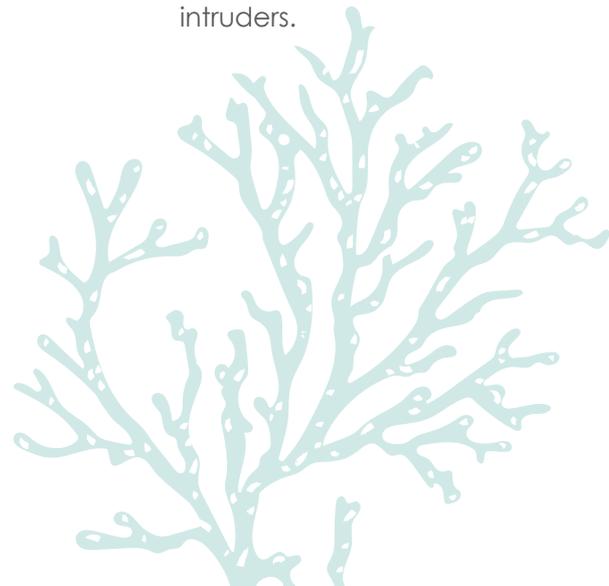

New Animals

- **Red Octopus** (*Octopus rubescens*): male red octopus were added to the cephalopod gallery
- **New Tope shark** (*Galeorhinus galeus*)
- **New male sevengill shark** (*Notorynchus cepedianus*): Visitors are captivated by the sheer size and striking presence of this elusive predator.
- **Sarcastic fringehead** (*Neoclinus blanchardi*): Debuting in the pier pilings exhibit, sarcastic fringeheads are cryptic and mysterious animals that are very territorial. While they appear to be unassuming while tucked away in their dens, these animals are fearless and use their huge jaws to compete with others for territory as well as catch prey and ward off intruders.

1. North American river otter
2. Red octopus
3. Wolf eel

Tope sharks can weigh nearly 100 pounds, reach speeds of 12 knots traveling great migratory distances, and they have life spans averaging 55 years

A diver in a black wetsuit, mask, and snorkel is cleaning a large aquarium tunnel. The diver is positioned in the lower right of the frame, leaning over a ledge. The background shows a large, blue, underwater environment with various marine life and structures.

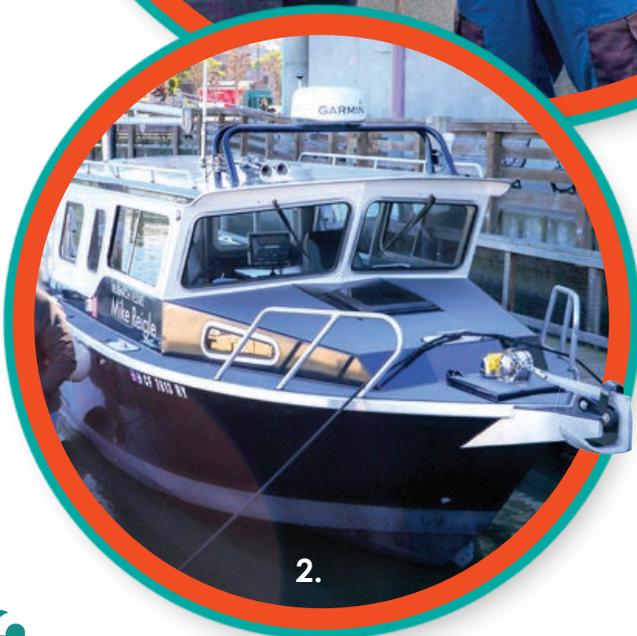

Volunteer divers continue to support aquarium in cleaning and maintaining the 300 foot long tunnel systems at the Aquarium of the Bay

Mike McGill Celebrates 27 Year Milestone Anniversary!

Mike McGill celebrated his 27th anniversary as an employee of Aquarium of the Bay on September 12th, 2023. Mike started here in 1996 as the Aquarium was getting ready to open and has been an integral part of the Animal Care team and the overall success of the institution. Over the years Mike has been involved in nearly every facet of caring for the animals that call the Aquarium home, and we are all so thankful for his dedication to helping inspire conservation and education of the San Francisco Bay and its watershed for the past 27 years. The longevity of service is a testament to the incredible work environment that has retained and sustained much of the talent through the years. Congratulations and thank you Mike!

1. Aboard the RV Mike Reigle in the bay, Mike McGill, Senior Animal, Care Biologist & Collections Coordinator, with Melissa Schouest, Director of Animal Care, conduct research.
2. Research Vessel Mike Reigle
3. Captain Mike McGill sharing a candid moment with President and CEO Dr. George Jacob

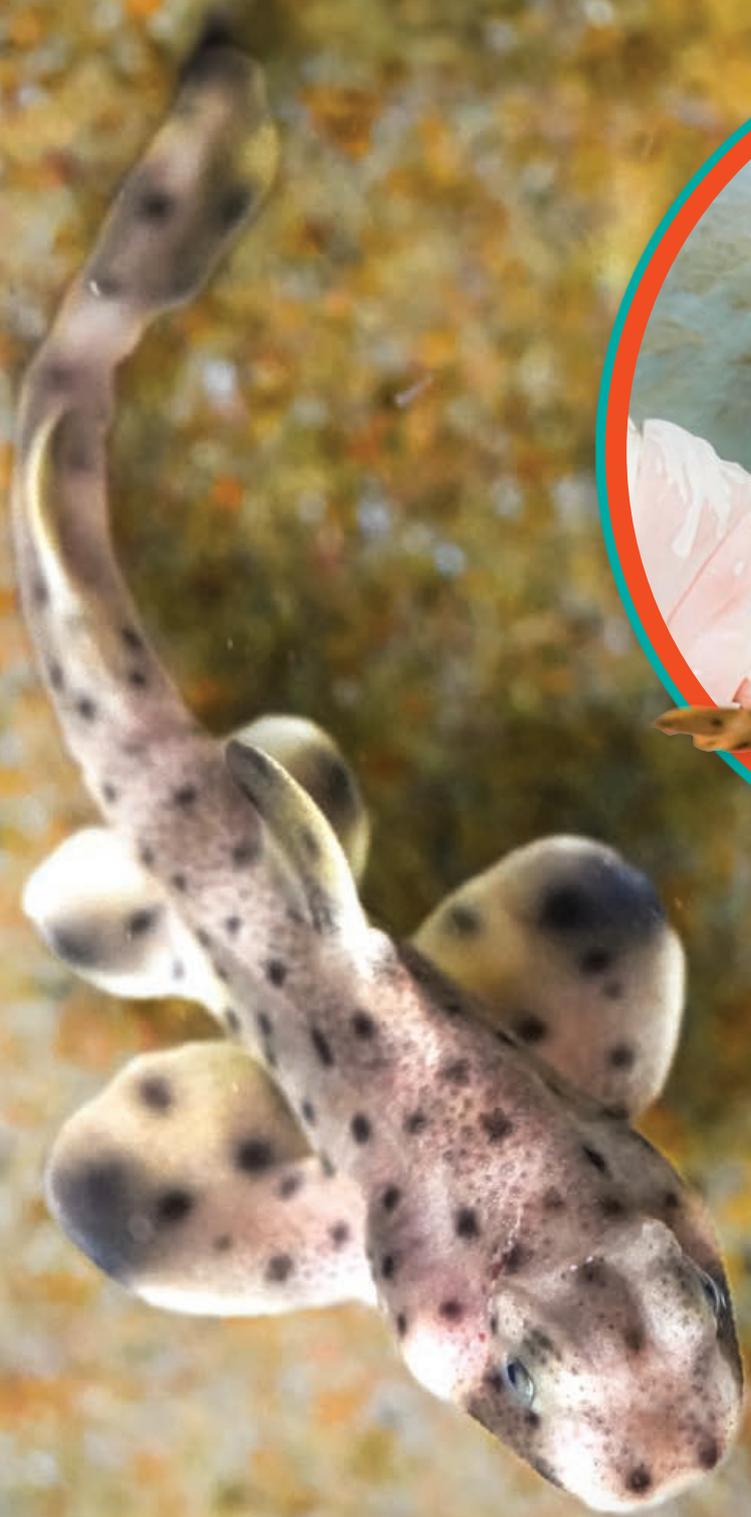

HALLOWEEN UNDERWATER PUMPKIN CARVING!

Animal Care team celebrated Halloween with divers carving pumpkins in the Near Shore Tunnel. This fun event was a delight for all ages and always surprising to watch how the animals interact with the divers and jack-o-lanterns. As the divers carved pumpkins over several days, other animals experienced pumpkins and Halloween themed enrichment around the aquarium.

Sarcastic fringehead now on exhibit in the Discover the Bay gallery.

Baby horn shark at 4 inches long and 16 grams, living behind the scenes for close observation during its initial critical points of development.

AQUARIUM BABIES

Baby horn shark

Aquarium of the Bay was thrilled to announce the momentous occasion of the birth of a baby horn shark in 2023. This historic event marks the first successful breeding and birth of a horn shark within the Aquarium's facilities, a testament to the dedication and expertise of the institution's Animal Care team.

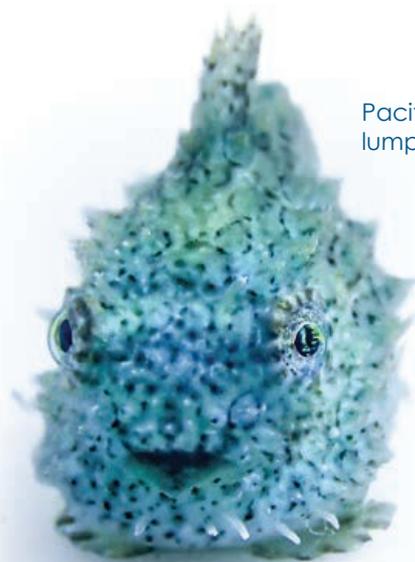

Horn sharks (*Heterodontus francisci*) are a unique and captivating species known for their distinctive appearance and horn-like spikes, which adorn their dorsal fins. Native to the Pacific coast of North America, horn sharks play a crucial role in maintaining the health and balance of marine ecosystems. However, these sharks have faced various challenges in the wild, including habitat loss and fishing pressures, little is known about their status in the wild and they are listed as Data Deficient on the IUCN red list, making breeding and conservation efforts paramount.

Sailfin Sculpin Success

The Animal Care team is carefully tending a second clutch of sailfin sculpin eggs, *Nautichthys oculofasciatus*, that have begun to hatch. These eggs came from a breeding event of our in-house adult population of sailfin sculpin. They are about the size of a grain of rice and are growing behind the scenes where they are receiving food and care 24-hours a day. We have received great interest from other AZA accredited facilities that will exhibit them when they are old enough to ship, which is one of the many ways we work together to promote and inspire conservation.

Baby Pacific spiny lumpsuckers thrive

In April of 2023, several dozen Pacific spiny lumpsuckers successfully hatched at Aquarium of the Bay. Our highly skilled biologists have been providing them with around-the-clock care and nutrition so that they will grow and thrive. When born they were just a few millimeters in size and now are nearly a centimeter in diameter. Lumpsuckers are a peculiar looking animal, they are round, come in a variety of vibrant colors and have evolved to have suction cup like discs on their ventral side which allows them to attach to rocks and other surfaces; and how can you not smile at their adorable faces.

USDA VISIT SHOWCASES EXEMPLARY AQUARIUM OF THE BAY

Our facility had the honor of hosting a group of employees from the United States Department of Agriculture (USDA). This event brought together a group of USDA employees from various corners of the nation, who specialize in public affairs and communications within the Animal and Plant Health Inspection Service (APHIS). APHIS, a crucial arm of the USDA responsible for safeguarding American agriculture and natural resources; including animals on display at zoos and aquariums. These experts came together to witness the real-world implementation of their work and gain invaluable insights into how their efforts translate into on-ground practices. Our local USDA inspector, Mr. William Campbell, chose our facility as a prime example to demonstrate the practical implementation of regulations and compliance. He introduced the group to our establishment, emphasizing that we are committed to upholding the highest standards and taking regulations to heart.

This event was more than just a tour; it was a testament to the Animal Care teams dedication, commitment, and the values that drive us. The endorsement from a respected figure like Mr. Campbell affirms our unwavering commitment to adhering to regulations and maintaining the highest standards in our operations.

**Berkeley
Haas**

UC BERKELEY HAAS INNOVATION FORUM ENGAGES AIMA CEOS IN CORPORATE SUSTAINABILITY INITIATIVES

20 CEOs and executives from the All India Management Association visited the Aquarium with Professor Solomon Darwin for a guided tour led by Aquarium Education Manager Doug Apple. This was followed by a lecture by President and CEO Dr. George Jacob that highlighted sustainable design elements of the new BayEcoTarium - ranging from LEED platinum standards to the use of sustainable materials and 360 processes mission-aligned with our non-profit mandate.

RIVER OTTERS FROLIC IN THE JULY SNOW!

The aquarium celebrated the 10-year anniversary of the North American River Otter exhibit. Staff and volunteers packed our otter exhibit full of snow on July 25th for a mind-summer otter snow day. Guests had an otterly fun time watching Baxter, Ryer, Tahoe and Shasta frolicking in mounds of fluffy white snow generously donated by A. LaRocca Seafood.

Birthday Celebration

North American River Otter Shasta (right) celebrated his 13th birthday on April 19th, 2023. Senior Biologist, Noel (our expert seafood baker) made Shasta his favorite frozen clam cupcakes to celebrate this special day.

PLAQUE DEDICATED IN MEMORY OF MIKE REIGLE JUNE 8, 2023 WORLD OCEAN DAY

On UN World Ocean Day on June 8th, we hosted a rededication ceremony for the Research Vessel “Mike Reigle” to commemorate its role 5 years of Aquarium research initiatives and unveiling a plaque in honor of late Mike Reigle, followed by a four-course dinner in our glass acrylic tunnels for guests to dine with a spectacular view of 24,000 animals in our 750,000 saltwater tanks. Jon Fisher and daughter Avery dived into the tanks with Hunter Coughlin in support of the Aquarium’s Ocean Conservation mission. Ocean Ambassadors Miss California 2022 Catherine Liang and Miss Nepal 2021 Wendy Shew engaged and inspired the audiences with their love for the oceans.

As the weather finally began to clear, the animal care team prepared to head out on the Research Vessel Mike Reigle. Each year, the team leads a boat safety class followed by field exercises which include person overboard drills and abandon ship drills. In preparation for our 2023 collecting season, the R/V Mike Reigle was taken over to Berkeley Marina for its annual haul out, hull painting, and engine tune-up.

Animal Care staff practicing man-over-board drills on the RV Mike Reigle.

AZA RE-ACCREDITATION

Smithsonian Affiliated Aquarium of the Bay in San Francisco gets Association of Zoos and Aquariums (AZA) re-accreditation 2023-2028. A testimony to the dedicated staff and volunteers as we celebrate our 27th anniversary of public service. Proud moment indeed!

Aquarium of the Bay receives AZA re-accreditation following the final review at a conference held in Oklahoma City. The review committee commended the aquarium team of their excellent presentation and responses to the detailed review questions.

Kevin McEligot, Associate Director Animal Care, provides a behind the scenes tour to a family visiting from the silicon valley examining the tiny Lumpsuckers hatchery tank.

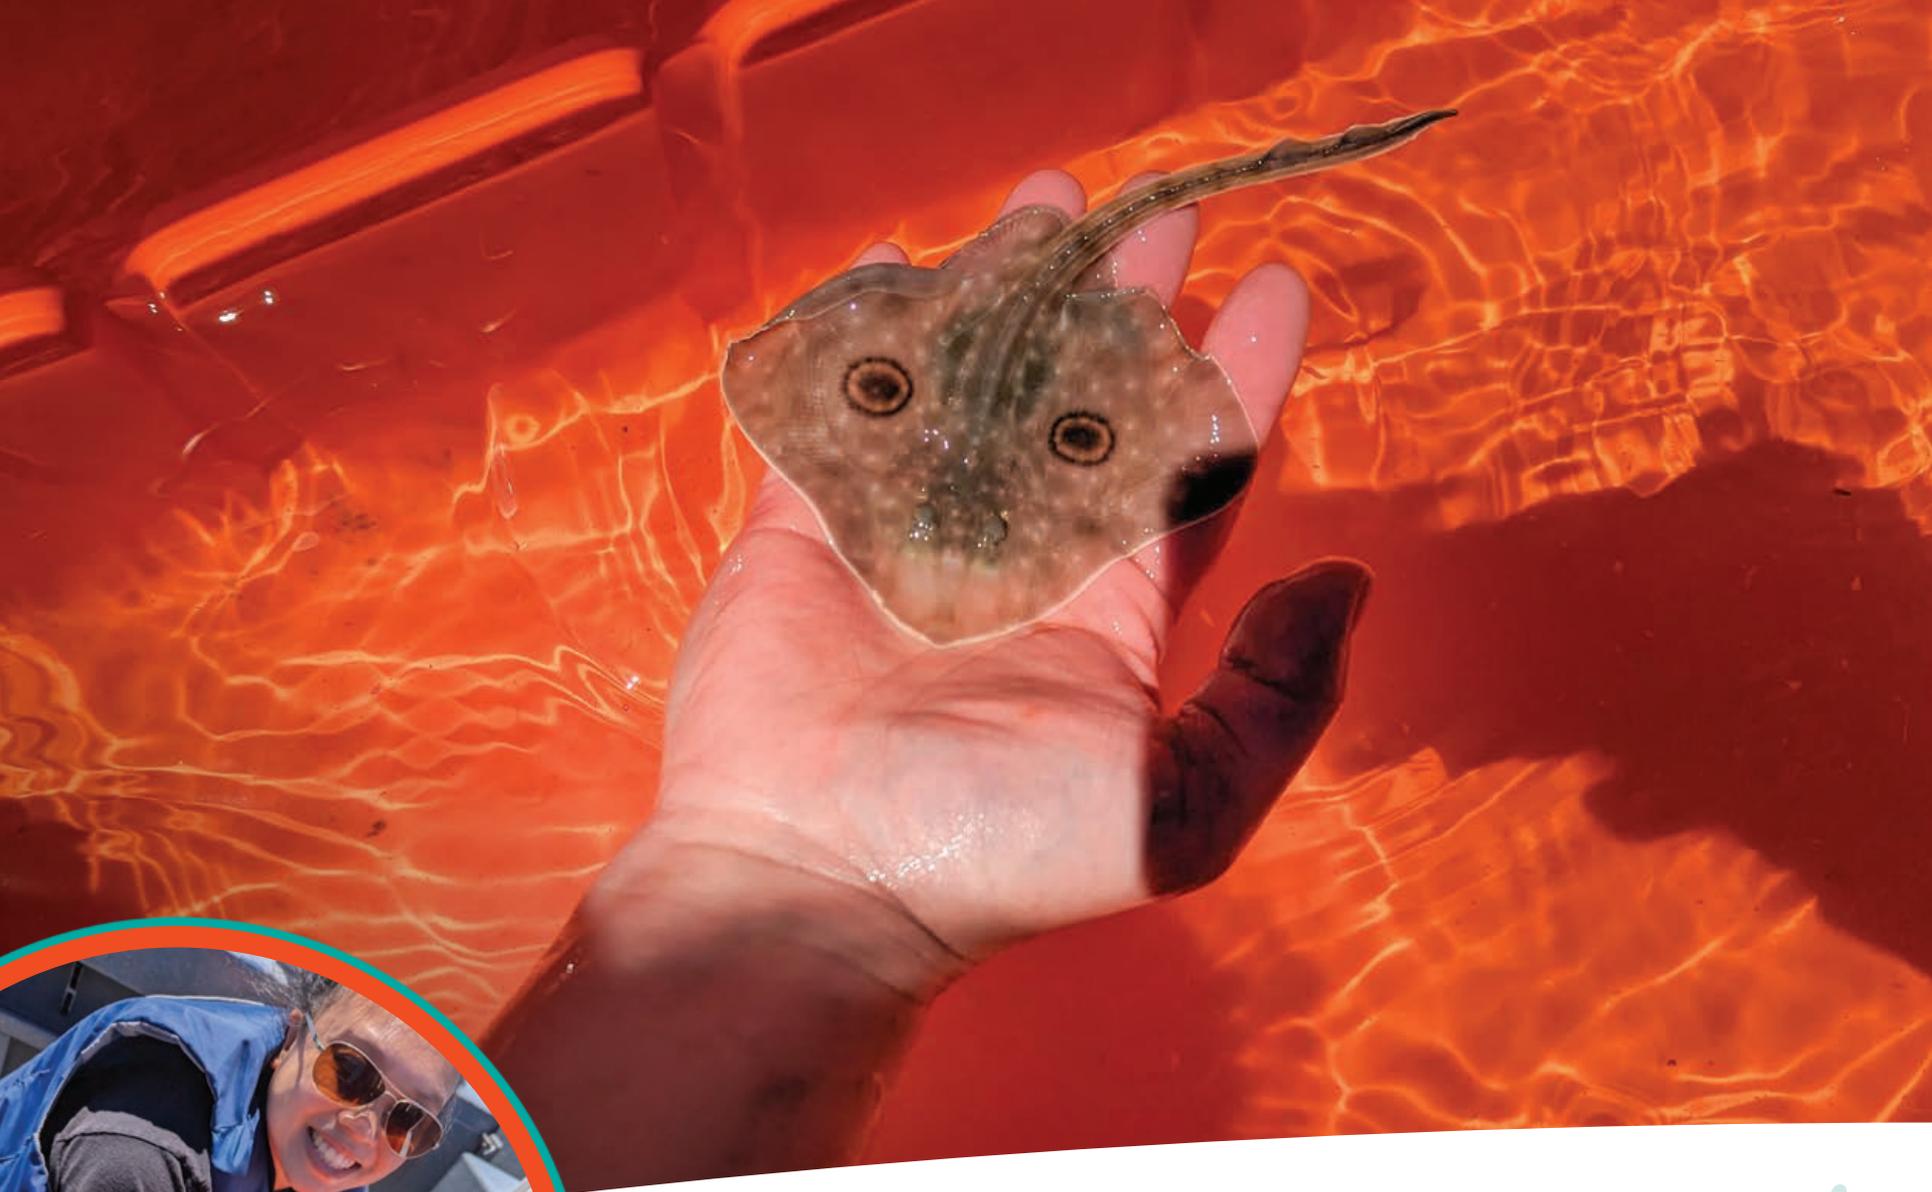

WINE WOMEN & SHOES

The Events team successfully put on the Wine Women and Shoes event on March 30th! There was a lot of work done to make the event a reality, and we were blown away with the fruits of the Events team's labor. The successful night was full of luxurious shopping, great food, tasty wine, and exciting live music that included a live performance by Broadway actor Claybourne Elder.

SMITHSONIAN AFFILIATE
AQUARIUM OF THE BAY TO HOST 'WINE WOMEN & SHOES'

ANIMAL RELEASE MAKES HISTORY

With special permit approvals from the California Department of Fish and Wildlife, we were able to release 5 captive born Bat Rays and 10 captive born Big Skates back into the San Francisco Bay. At the Aquarium, we have a population of healthy reproducing bat rays and skates, that produce more offspring than we can care for, and this is an exciting opportunity to help contribute to the native marine diversity populations for these dynamic and engaging species.

Our female skate is continued to produce viable egg cases in the Nearshore Tunnel and we successfully released another batch of big skate eggs back into the San Francisco Bay in September.

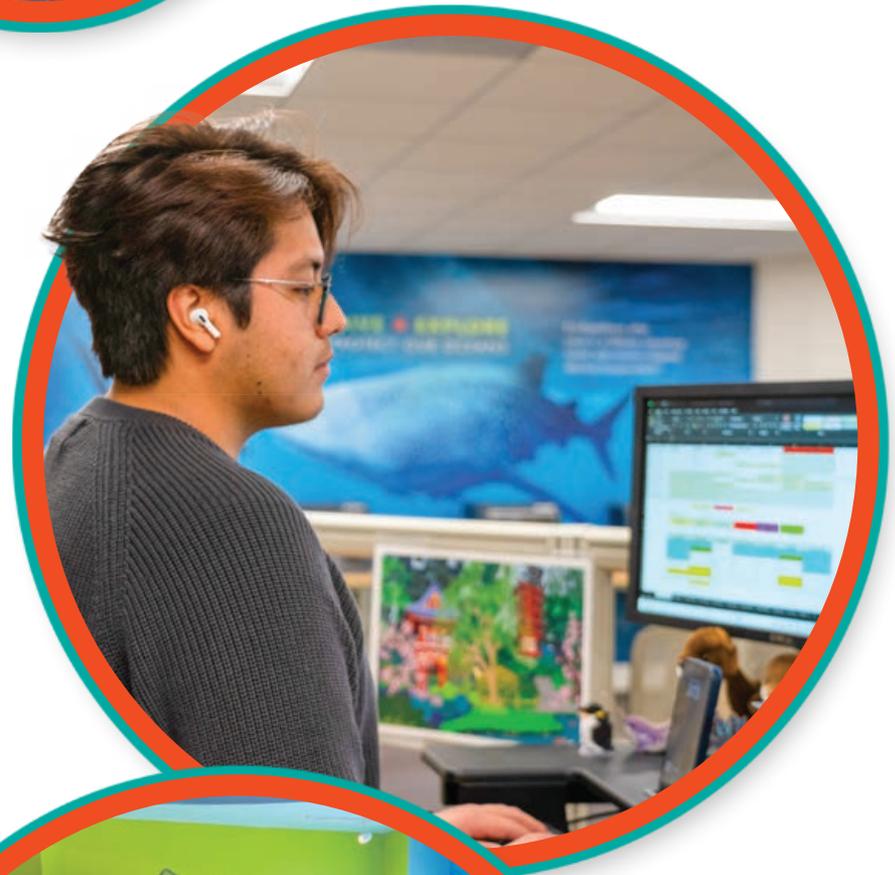

Melissa Schouest, Director of Animal Care, leans over RV Mike Reigle to release Bay Ray into the Pacific Ocean.

▶ Volunteer Owen Wang shows off shark jaws to guests at the Shark Cart.

▼ Richard Arauz, Volunteer Coordinator, working on the volunteer schedule.

AQUARIUM VOLUNTEERS MAKE A DIFFERENCE

Our education docent volunteers help guide guests throughout the Aquarium to each exhibit. They also answer questions and ensure our visitors have a memorable experience. One way our docents put smiles on guests' faces is by showing them how to gently touch one of our marine friends and sharing information about them. Many families love how they are able to touch a shark or a bat ray for the first time and our docents are able to make that happen for so many people every day. The Aquarium also has an all-Volunteer dive team.

▶ Volunteer helping clean the touch pools in the Bay Lab gallery.

Why are Small Fish Such a Big Deal?

When these small fish are in trouble, we're all in trouble.

Small, schooling animals like herrings and anchovies are an important source of food for large predators in the Bay. Without enough small fish to eat, bigger fish, sharks, sea lions, diving birds and our fishing industries might all dwindle away.

SLIDE BAR

AQUARIUM COLLABORATES ON STUDENT WORKSHOPS DURING **ONE OCEAN WEEK** AT BERGEN NATIONAL AQUARIUM

Aquarium of the Bay team aside “the tall ship” Statsraad Lehmkuhl, returning home from it’s 20-month circumnavigation around the globe. Its arrival kicked off the One Ocean Week festival in Bergen, Norway, a productive rendezvous for global ocean solutions that is set to be hosted in San Francisco in 2025! We are thankful to the Bergen National Aquarium for hosting the team and hope you can all join us when the ships comes to San Francisco.

ST[®]

▶ One Ocean Week kickstarted in Bergen, Norway. Smithsonian Affiliated Aquarium of the Bay in San Francisco and the Bergen Akvariet bridge the Pacific and Atlantic as a one ocean collaboration titled "0" as Director Aslak Sverdrup leads a morning expedition to the tall ship Statsraad Lehmkuhl that returned after 20 months at sea. His Majesty King Harald of Norway was in attendance to receive the vessel.

GUEST SERVICES & RETAIL

Aqua-3OTs Begin Tours

Following the Covid 19 Social distancing protocol, the Aquarium began exploring prospects of introducing robot gallery guides. After a few test runs and creative content generation, the aquarium began experimenting with Aquabots installing the first multi-lingual robot gallery guide to enhance the visitor engagement. Upon entering the first Discover the Bay gallery, guests can gain insights to 5 different exhibits on a robot guided short tour replete with high impact video and audio content. The IT team setup the robot's pre-programmed tour trajectory with timed videos with the help from our partner Tuff Robotics. It has been a huge hit with our youth guests so far!

Aquarium of The Bay Partners with SkyStar Wheel

The Aquarium has on-going partnerships with Big Bus, Blue and Gold Fleet, Madame Tussaud's, and The Flyer/7D. Guests can buy individual tickets or build the package of your choice at any of our ticketing locations. We have seen an increase in ticket and package sales since November. With the holidays just around the corner, you can gift your loved ones with fun and exciting experiences! Our newest partner SkyStar Wheel (The Ferris Wheel) relocated from Golden Gate Park to Fisherman's Wharf! Combo Tickets are now available at our ticketing locations. SkyStar Wheel offers unparalleled views from San Francisco's crown jewel, the City's first waterfront observation wheel in more than 100 years. Standing over 150 feet tall along the waterfront in world-famous Fisherman's Wharf, SkyStar Wheel boasts of spectacular views of San Francisco and the gorgeous Bay that surrounds it. From never-before seen bird's eye views of San Francisco's North Beach, Russian Hill and Telegraph Hill neighborhoods, to Coit Tower, the Golden Gate Bridge, the Bay Bridge, Sausalito and notorious Alcatraz Island, SkyStar Observation Wheel offers 36 gondolas that can host up to 6 guests per gondola.

SKYSTAR FISHERMAN'S WHARF

1. Aquarium of the bay becomes the first attraction in California to introduce multi-lingual robot guides. This imitative was started following COVID-19 social distancing and has a tremendous response from school children.

Aquarium has partnered with SkyStar on combo tickets that enhance visitor experiences on the Embarcadero.

AQUARIUM OF THE BAY

MERCHANDISING AND E-COMMERCE

The Retail Team has been consistently adding vibrant and stylish branded merchandise to the retail outlets and on-line eco-store platform. Having undergone a major facelift in its interior décor and display, both retail outlets in the Aquarium are much brighter, exciting, and enticing for visitors looking for a souvenir. Thanks to the team efforts, the well-organized and well-stocked Eco-store is set to make higher sales than ever before. In addition to the physical retail store locations, the online Eco-store is selling extraordinarily well with a continuous stream of new items and seasonal gifts for all ages. The aquarium online store now offers a diverse selection of products across five distinct categories: Apparel, Souvenirs, Books, Home Goods, and Stuffed Animals & Toys. We are actively in the process of incorporating popular retail items into our web inventory for a seamless shopping experience.

Sustainable Products

Exciting new items hit the shelves for guests during the Summer, including all-new plush toys made from recyclable bottles and are 100% eco-friendly. The aquarium offered other brand-new apparel for guests to wear and show their love for the oceans and all animals who live in it. New Custom Merchandise was created for the UN COP28 Climate Summit including water bottles, T- Shirts and Lapel Pins with PEACE and UN SDG circles.

New products are flying off the shelves, with items such as the plush sea lions, turtles, and otters.

ADULT
Short Sleeve T-Shirts

AQUARIUM OF THE BAY

INFORMATION TECHNOLOGY

Redesigning Webstore and Ticketing Page

The Eco-Store of The Aquarium of The Bay is proud to introduce its newly redesigned webpage. Upon the initial launch of our website, the design was relatively rudimentary, lacking visual coherence with our ticket sales portal. The IT team focused on a straightforward design ascetic with reactive bubbles, rounded corners, and better integration with our new color scheme

Automated Ticket Kiosks

IT and Guest Services experimented with automated kiosks at our plaza ticket booth outside the Aquarium. The system showed promising results with an increase in usage at the booth during the trial period. IT will continue to review the data and options to optimize the service for possible full-time use.

Braille 3D Printed Kits for Visually impaired

Multiple Maker-bot 3D printers and scanners continue to generate experimental braille kits that co-link marine bio-diversity and educational content on bio-degradable corn-starch based diskettes. Once combined with audio, these kits can be used with visually impaired school kids to impart accessible content. Currently, there is no other aquarium that delves in this realm. We intend to complete this initiative to scale in 2024 for the intended demographic and are actively exploring grant opportunities

Evan Louie, IT Manager, working on a PC.

Patrick Doran, Director of IT, showing various 3D prints.

Automated kiosks at Aquarium of the Bay

was the megalodon?

AQUA-30's

Tour path and programming for the first robot at Aquarium of the Bay, shown in the Discover the Bay gallery.

FLEET WEEK 2023 WATCH PARTY

The daredevil topgun pilots dazzled with aerobatics as the blue angels thundered through the sky during fleet week. The aquarium balcony offered unmatched panoramic views of one of the most incredible airshows on the planet.

TRADESHOWS

National AZA conference

Smithsonian Affiliated Aquarium of the Bay sent some of our amazing team to the national AZA conference (Association of Zoos and Aquariums) in Columbus, Ohio. This annual conference provides a vital opportunity for collaboration, sharing ideas and best practices, and new issues and trends across the field.

Director and Associate Director of Animal Care attended talks on advancements in animal husbandry, veterinary medicine, animal behavior and wellbeing. Education Manager met with contemporaries and shared innovative ideas on enhancing educational programming and outreach efforts to increase the impact aquariums and zoos have as powerful educational tools while General Manager engaged in workshops on new technologies and sustainable practices to enhance accessibility.

This conference is pivotal to ensuring AZA accredited institutions continue to make meaningful contributions to wildlife conservation, environmental education and provide exemplary care for our animal collections.

IPW 2023

Sales and Events attended the 2023 International Pow Wow (IPW) in San Antonio, Texas - the largest trade show in the United States with over 5000 delegates. Cathy Tolentino and Hannah Woodall met with tour operators, OTA's, and attractions from around the world to deepen current relationships and build new ones. As countries seem to be opening for travel post-Covid, buyers are looking for hotels and attractions to offer group rate.

1. Hannah Woodall experiencing a cultural activation featuring a Texas Longhorn in San Antonio during IPW 2023.
2. Rockfish
3. Doug Apple, Melissa Schouest, and Kevin McEligot checking out the various bears in the Polar Frontier area of the Columbus Zoo during the AZA conference.

BPS ANNUAL DAY HONORS DR. GEORGE JACOB AS CHIEF GUEST

In a two-day ceremony, President and CEO Dr. George Jacob was honored as the Chief Guest for the Annual Day of one of the foremost residential schools in India. The ceremonies included a guard of Honor, Band, horse-riding, science and art fairs, theater, music and sports, gymnastics and martial-arts demonstrations performed by nearly 1000 K2-12 students at his alma mater.

President and CEO Dr. George Jacob with senior faculty members and director of Birla education Trust, Lt. General SS Nair at Birla Balika Vidyapeeth following his Key Note address.

President and CEO Dr. George Jacob with Director BK Birla Institute of Engineering & Technology S M Prasanna Kumar and Mr. K K Pareek being honored with shall after his Key Note address to the students.

YOUTH OCEAN AMBASSADOR AVERY FISHER BREAKS WORLD RECORD

13-year-old Avery Fisher broke the Guinness Book of World Records for diving into our tunnels and performing 38 magic tricks in under 3 minutes at 58F degree temperature. This was an incredible feat in support of the Aquarium and its mission of Ocean Conservation and environmental advocacy. Avery has been our Youth Ocean Ambassador since 2020 leading the call to support our non-profit through the toughest COVID shut-down months.

AQUARIUM OF THE BAY

FACILITIES AND LIFE SUPPORT SYSTEMS (LSS)

The facilities team has been hard at work improving and maintaining the critically important Aquarium, and the exhibits have never looked better! Improvements can be seen in every corner of the building, and the responses from our guests have been glowing. Moving forward, the team plans to improve and update Discover the Bay, life support systems, the elevators, and more. Guests will also see new wall graphics, 3D screens, banners, and new and improved additions to the animal holding tanks. Thanks to the Facilities Team, the Aquarium looks more future-forward and engaging than ever!

Salt for Low Salinity Conditions in the Bay

Due to recent low salinity in the Bay, the Facilities team added salt to the tanks to more closely mimic typical San Francisco Bay conditions and provide a more comfortable environment for the animals. Having exhausted the first load of salt, the Facilities team procured another 4,000 pounds for Aquarium exhibits.

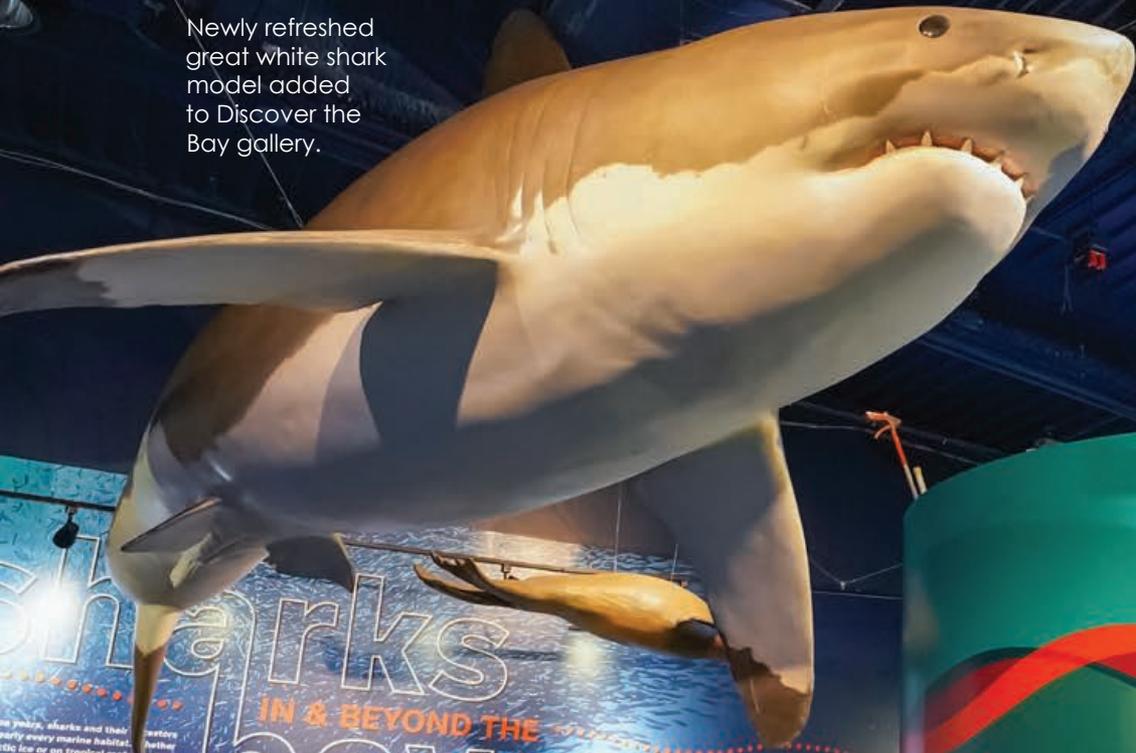

Discover the Bay Great White Shark Model

The Great White shark scale model (Bite Head) that hung outside the aquarium saw a total refresh done by exhibit designer Evan Barbour. The updated shark model (Bite Head) found a new home in the Discover the Bay exhibit and installed it on the ceiling to depict a chase sequence with three sea lions. This was a dramatic addition to the galleries with information on local shark sightings. The Bite Head model was created to scale, accurately representing a 15-year-old great white shark that frequents off the Farallon Islands, nick-named due to bite marks on the side of his head.

Thousands of pounds of salt delivered to the aquarium for adding to tanks due to low salinity conditions in the bay.

Newly refreshed great white shark model added to Discover the Bay gallery.

AQUARIUM OF THE BAY

Ozone Filtration Revamp

The Facility team replaced the aging infrastructure of the ozone filtration system, starting with new ozone contact chambers. Ozone filtration is one of the vital components to maintaining the aquarium's water quality parameters and ensuring water clarity for the viewers. The scope of this project also involved replacing pumps, plumbing runs, valves, gauges, and monitoring equipment.

Promotions

Employee Keith Pitts was promoted to the position of Senior Life Support Systems Engineer, and his focus is to work closely with the Animal Care Staff and oversee preventive maintenance. Director Facilities and LSS- the 27 year veteran of the Aquarium- Chris Low was promoted and given additional charge as Deputy General Manager Aquarium Operation.

Tropical Holding System Renovation

Aquarium of the Bay is preparing for a new and expanded tropical reef exhibit in the spring! The first steps entail setting up holding and quarantine space behind the scenes to house the animals currently on exhibit. Four new tropical holding systems have been built, ranging from 40 gallons to 200 gallons, and the first round of stony corals have been moved off exhibit. We are excited about the new exhibit and will share updates as it opens to the public in the Spring of 2024.

1. Removed existing original ozone contact chambers with new ones as well as new monitoring equipment.
2. Removed the four existing original ozone booster pumps (front) with new pumps (back).

1.

2.

3.

1. New ozone contact chambers arrive at Aquarium of the Bay and hoisted to the second floor service entrance.
2. Jeff Weaver, Associate Director of Facilities and LSS, finishes moving the new ozone contact chambers into the Aquarium to prepare for installation.
3. Aquarium staff removing old ozone contact chamber while wearing protective gear.

RESILIENCE

CLIMATE CONCERT

As the world gathered in the UAE for the historic United Nations COP28 Climate Summit in December 2023, a Climate Concert hosted by us jointly with UNCCD was held at Dubai Opera in solidarity with the message of Sustainability and Climate Resilience. The BayEcoatarium is in the transformation stages into the world's most comprehensive data driven living climate museum. Multiple Grammy Winners led by the legendary co-founder and drummer of THE POLICE band, Stewart Copeland delivered a stunning performance of their multi-platinum hits in orchestral

renditions (POLICE DE-RANGED) with Dubai-based all-female Firdaus Orchestra. UN Goodwill Ambassador and 3X Grammy Winner Dr. Ricky Kej took the stage with award-winning talent to engage the audiences from 170 countries with a musical tribute to our Blue Planet, Climate Change mitigation and Global Peace, as part of the Opening Act. Anuradha Juju dedicated a Climate Theme Song to the Blue Marble. Dr. Andrew Steer, President & CEO of Bezos Earth Fund delivered the Key Note.

"Her Deepness" Dr. Sylvia Earle passed on the future of the Planet to our Youth Ambassador Ryer Kadyk in a symbolic gesture.

RESTORING RESONANCE

Chal Phir Sajaayein

COP28
UAE

Aaj zameen ne mujhse kaha
Today the earth implored me
اليوم الأرض توسلتي

DR. GEORGE JACOB ADDRESSES G20 SUMMIT IN NEW DELHI AND AT COP28 IN DUBAI ON CLIMATE ACTION

Organized by Indiaspora, both international events drew delegates from G20 nations and from around the world in unison for climate awareness leading to sustained climate action. The sessions explored avenues where developing nations would collaborate with developed nations to work towards mitigating the carbon-footprint, engage in technology transfers and share regulatory platforms to bring about measurable change leading up to the UN SDG goals of 30x30 by 2030.

1. President and CEO Dr. George Jacob giving Key Note, Climate Track, at G20 Summit.
2. President and CEO Dr. George Jacob discussing climate action at Indiaspora COP28, Dubai UAE.
3. US Ambassador to India and former LA Mayor Eric Garcetti with Dr. George Jacob at G20.

**COP28
UAE**

“ Let’s urge the leaders of nations (at COP28) to preserve our common home, hear the cries of the weakest, whose prayers reach the most High, seeking to live in Peace. ”

POPE FRANCIS

“ You need some kind of deal whereby the carbon market money would come in together with a government subsidization . . . together with philanthropic money. That money can actually help de-risk private investment in a very good way...We’re going to put a billion dollars into conserving nature, a billion dollars into restoring nature, and a billion dollars into reforming the food system. ”

Dr. ANDREW STEER

President & CEO, Bezos Earth Fund

“ More than 70% of natural ecosystems are significantly altered already. Reversing these processes will create green jobs and revitalize farmlands where communities are falling behind. It is an opportunity to turn unusable land into clean energy farms. ”

IBRAHIM THIAW

Executive Secretary UNCCD

United Nations
Convention to Combat
Desertification

“ As the first country in the region to ratify the Paris Agreement, the first to commit to an economy-wide reduction in emissions, and the first to announce a Net Zero by 2050 strategic initiative, the UAE is committed to raising ambition in this critical decade of climate change. ”

H. E. MARIAM ALMHEIRI

UAE Climate Change and Environment Minister

AQUARIUM OF THE BAY

HUMAN RESOURCES AND AWARDS

Human Resources at Bay.org remains dedicated to promoting inclusivity and ensuring a secure and welcoming work environment that enables staff to do their best work every day. In 2023 we had many opportunities for growth and improvement. Currently, only 10% of our employees work part time, which means more of our staff are now eligible for benefits, such as health insurance, transit, and cellphone stipends. Additionally, we achieved a significant success in HR by promoting Jasmin Guzman to HR Coordinator and Richard Arauz to Volunteer Coordinator. This bolstered our recruitment and onboarding efforts for both employees and volunteers, as well as the implementation of new health and wellness programs. We also recruited a dive volunteer, successfully integrating them into the Animal Care team.

To ensure diversity and inclusivity, we formed a Diversity Team comprising representatives from all departments to review and update our existing DEIA program, and will start with DEIA training for all staff early 2024. We also improved staff and volunteer engagement through various initiatives, including Donut-n-Coffee Day, Birthday and Anniversary Celebrations, monthly competitions, and events to appreciate and recognize our staff and volunteers.

We couldn't have done all the great work and accomplished so many milestones without the support and collaboration from our partners throughout the organization. From delivering new and innovative technology improvements, to identifying strategic needs and priorities for departments, the road to operational excellence begins with you. Looking towards the future there's a lot to be excited about. We remain focused on delivering continuous improvements particularly in modernizing and enhancing our HR & Volunteer processes. We are also thrilled to unveil a cost-effective employee portal in the second quarter of 2024. We will continue to collaborate with our leadership team to deliver excellent service, foster a culture of learning, and provide opportunities for individual career growth. It is an honor to lead and support this team and I look forward to your continued partnership and collaboration

PRESIDENT & CEO KEY NOTES ICOM PARAGUAY

Four international committees- ICTOP, INTERCOM, MPR and ICMAH- convene for the first time with International Council of Museums for the historic Climate Leadership and Action summit in Hernandarias. Attended by delegates from 45 countries, the summit stressed on the role of museums as they get increasingly targeted by climate activists and face the threat of cultural

and material vandalism, and to explore the future of museums as they learn to curate and harness climate awareness for sustained global action. Dr. George Jacob shared his vision for multiple climate awareness living museum initiatives the BayEcotarium currently leads in Norway, Jamaica, India and the United States.

▼
Museum delegates from over 45 countries gather at the second largest Itaipu Dam - an engineering marvel - to mark the opening of ICOM Paraguay in collaboration with 4 international committees for the first time.

DINNER WITH THE SHARKS ON WORLD OCEAN DAY!

On UN World Ocean Day on June 8th, we hosted a rededication ceremony for the Research Vessel "Mike Reigle" to commemorate its role 5 years of Aquarium research initiatives and unveiling a plaque in honor of late Mike Reigle, followed by a four-course dinner in our glass acrylic tunnels for guests to dine with a spectacular view of 24,000 animals in our 750,000 saltwater tanks. Jon Fisher and daughter Avery dived into the tanks with Hunter Coughlin in support of the Aquarium's Ocean Conservation mission. Ocean Ambassadors Miss California 2022 Catherine Liang and Miss Nepal 2021 Wendy Shew engaged and inspired the audiences with their love for the oceans.

AQUARIUM OF THE BAY

SEAFOOD ALLIANCE SURPASSES 100 RESTAURANTS IN THE BAY AREA

The Aquarium's Sustainable Seafood Alliance was first created in 2012 with the goal to educate and advocate for responsible seafood sourcing and consuming, as well as honor the restaurants in the San Francisco Bay Area already implementing sustainable practices. Unfortunately, due to the COVID-19 pandemic that temporarily closed restaurant doors and public gatherings, the program was put on hold. In 2022, the sustainability, marketing, and education teams collaborated to reimagine the Alliance and develop a more inclusive and accessible campaign for sustainable seafood awareness.

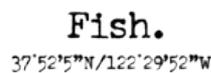

The Alliance's restaurant and vendor partners are committed to serving and sourcing products that leave as little negative impact as possible on the environment. The Sustainable Seafood Alliance provides resources such as a consumer guide on

best seafood choices and details on the Aquarium of the Bay website about fishing vs farming, local and seasonal consuming, and what to look out for when picking out fish in the supermarket. The objective is to avoid eating species from the IUCN endangered species "Red List" without compromising quality and flavor.

Members of the Alliance are dedicated to sourcing and serving the finest quality and freshest seafood for restaurants and their patrons. The Alliance is committed to serving and sourcing products that are responsible with as little impact as possible on the environment and is dedicated to educating the San Francisco Bay Area about the positive effects of eating the finest quality seafood from local vendors who supply products that are less harmful to the environment and better for overall public health.

Animal Ambassador Programs Return

As the Education team continues to make strides towards the return of daily public programs, October saw the return of World Octopus Day. The day celebrates our eight-armed friends and the team led multiple programs to highlight these captivating animals. Our Animal Ambassador programs will be making their triumphant return to weekly programs this November. Keep an eye on our daily program guide updates so you can plan your visit around the enriching programs.

Education Team Focuses on Community Outreach and Sustainability

The Education team spent much of the month of April working with over 1600 students and teachers from the Bay Area. One popular program during the month was the new "Kraken Lab!", a lab in which students learn about sustainable fisheries as well as the ins-and-outs of market squid, a sustainable population in California. April was also a month of outreach events for Education, as members from the team attended two separate festivals. The first was Alcatraz Community Day on April 14th, and the second was Pickin' on the Polk on April 22nd.

School is Back in Session!

The 2023-2024 school year has officially begun, and the education team is actively accepting registration from local Bay Area schools. With specialized programming options for all K-12 students, your child or student, no matter their age, can learn the ins and outs of the San Francisco Bay and its abundant wildlife. Programs range from our immersive Kraken Lab - an in-depth lesson on squid anatomy and sustainable fisheries, to our new 3D Print Lab - a dynamic introduction to 3D printing and plastic pollution.

BayEcotarium unveils concept designs for Sudhu Vaswani Peace park in New Jersey

Led by President & CEO Dr. George Jacob, the BayEcotarium generated the concept plan for a new Peace Park that will be integral to the Sadhu Vaswani Meditation center in New Jersey scheduled to open on Earth Day 2025. With three volumetric configurations that are both reflective and meditative, the Peace Park weaves multi-sensory elements of color, texture, fragrance, wind, light, water, mist, birdscape and subtle use of technology and indigenous craft into a contiguous volumetric timeless sustainable synthesis.

STUDIO AQUA

Botswana champions Climate Awareness: Carbon Curation to fast track new diamond museum

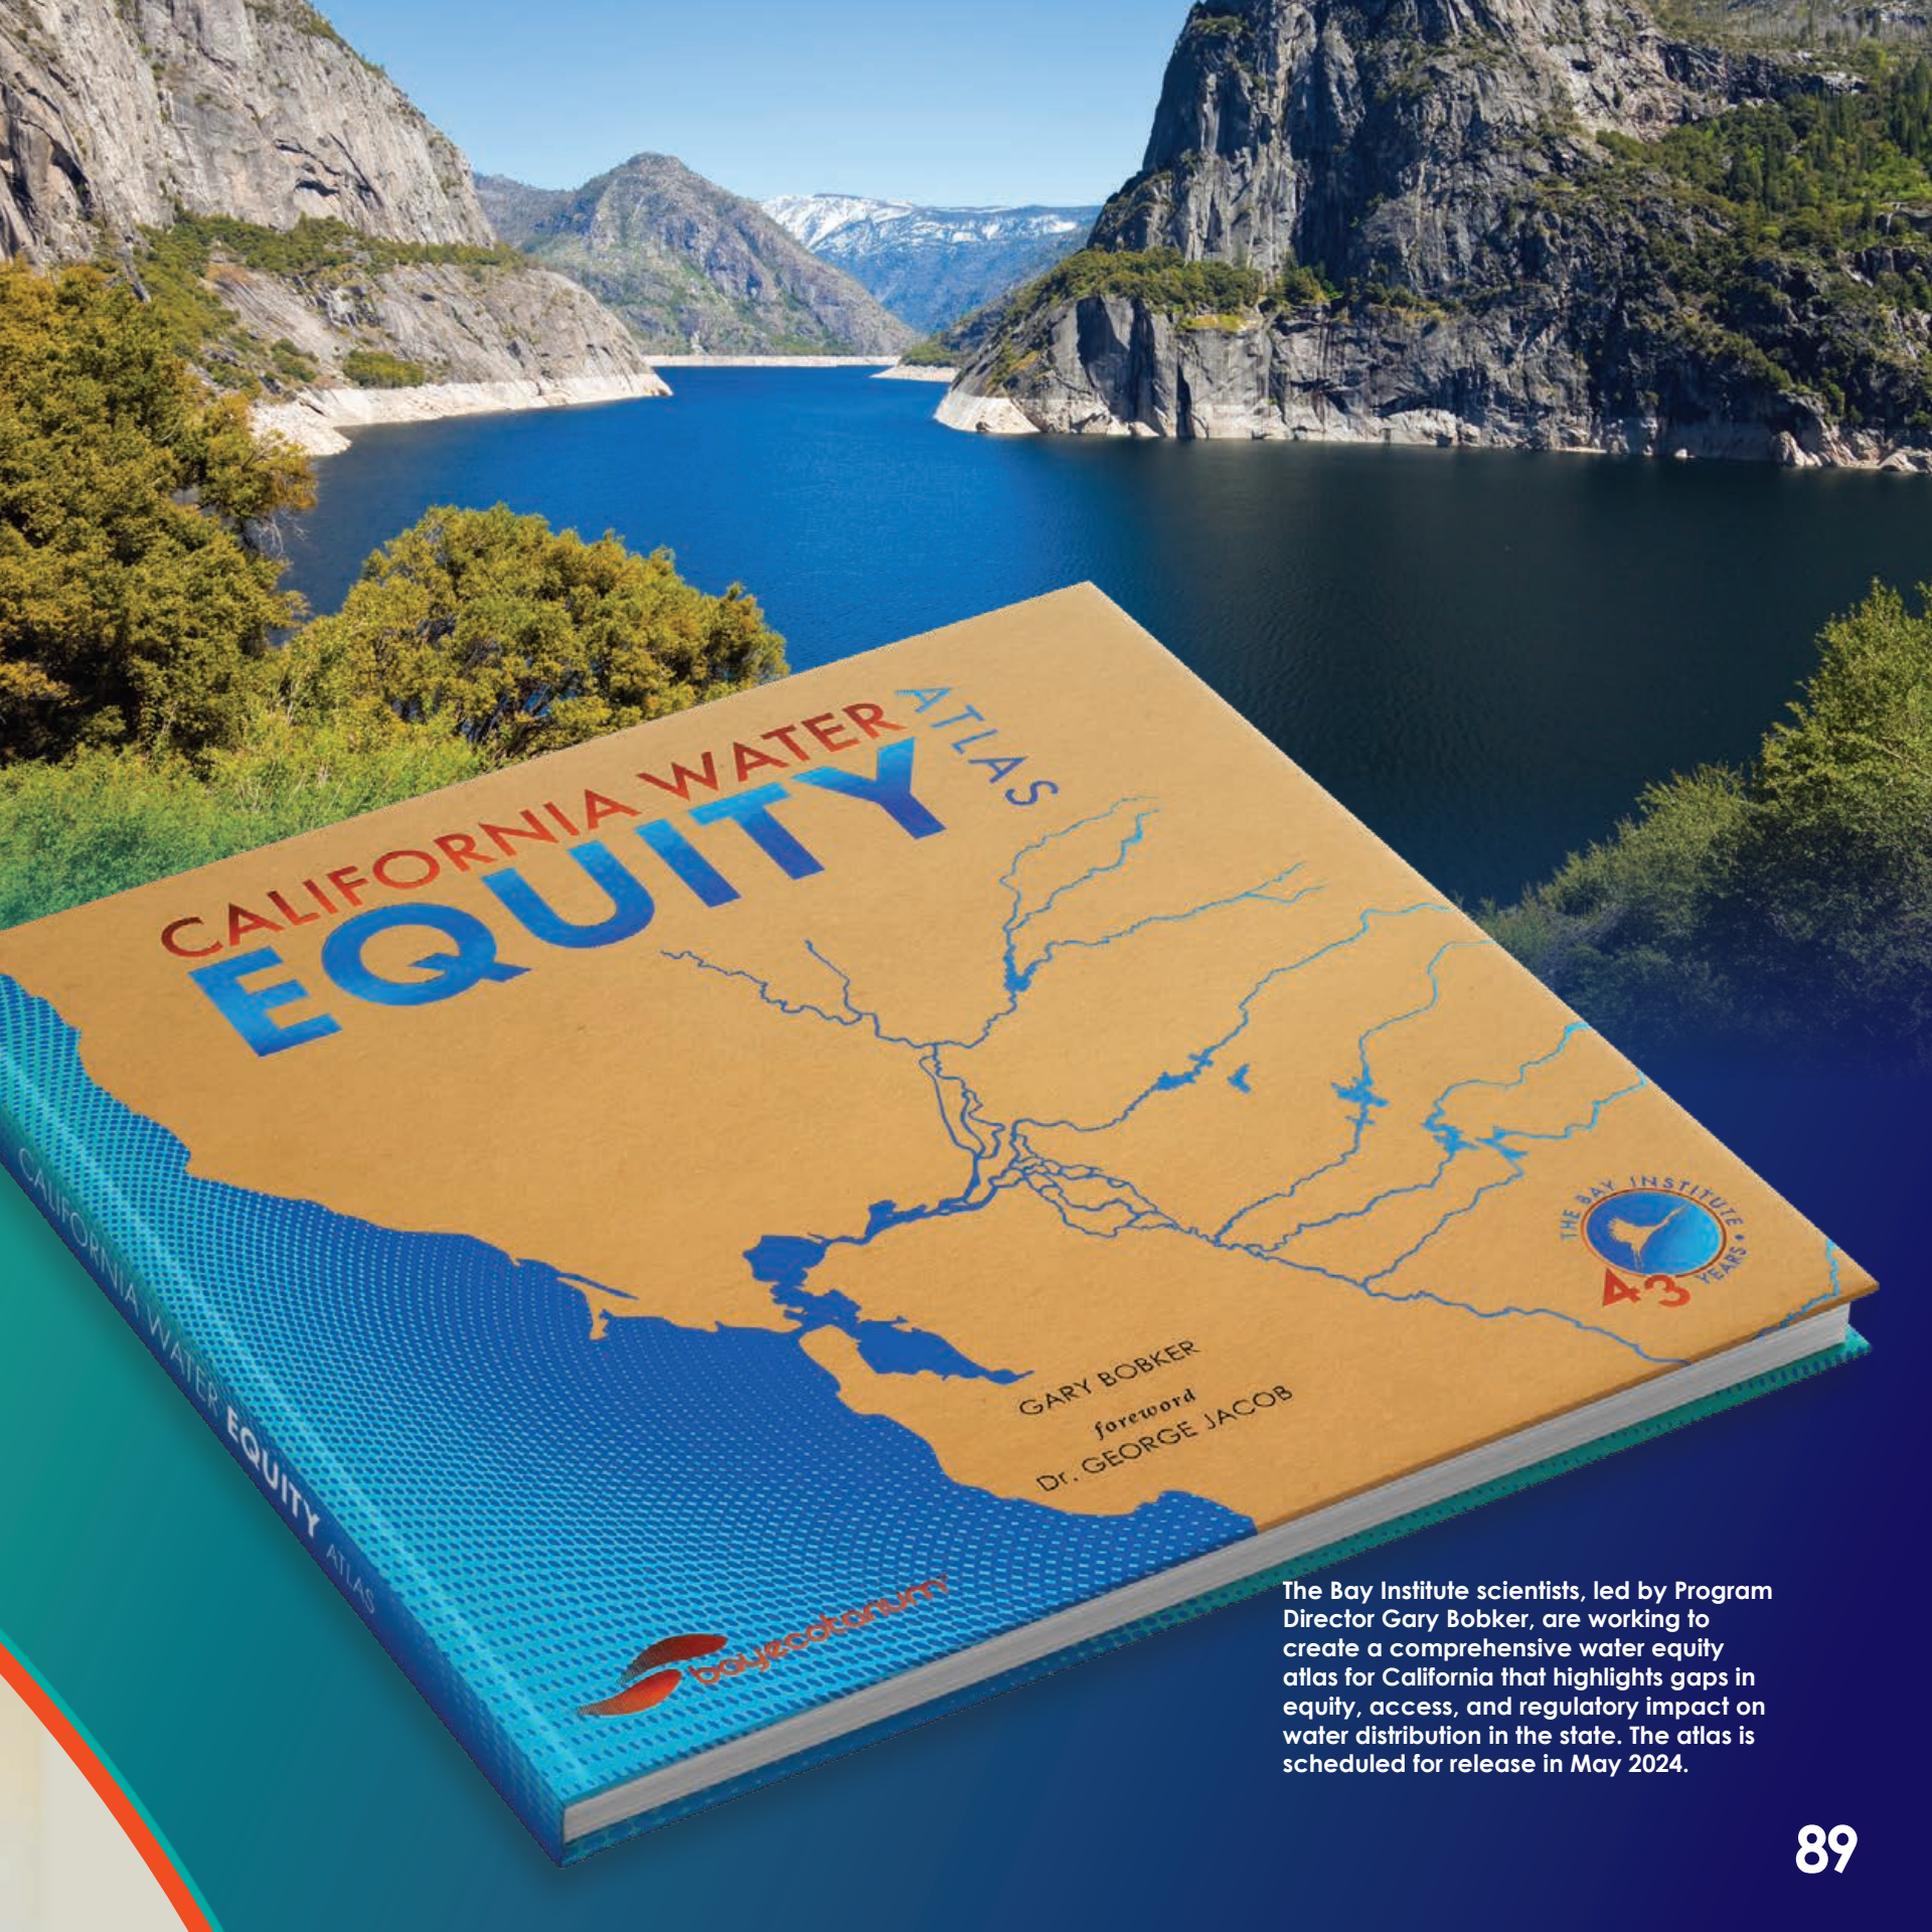

H. E. President Masisi and Chair of Botswana Stock Exchange Neo Mooki met with President and CEO Dr. George Jacob on the sidelines of UN COP28 in Dubai with senior Ministers of Environment, Tourism, Finance and International Relations to engage BayEcotarium on a new Diamond Museum. Botswana has long been recognized as a global leader in diamond mining and trade, with an exceptional legacy of responsible mining practices and sustainable diamond management. A new Diamond museum being proposed in collaboration with BayEcotarium, will focus on carbon curation and climate action.

While much of the content for the new dynamic museum will focus on traditional journey of carbon from coal to diamonds, a significant thrust of the curatorial direction will focus on the future of traditional and lab-grown diamonds and their

impact on carbon sequestration. Technology now exists that allows for carbon dioxide to be pulled from the atmosphere, converting the greenhouse gas (GHG) into the hydrocarbon methane. This combination acts as synthesized raw material fed into a reactor triggering a chemical vapor-deposition procedure that turns carbon atoms into precious stones. With each carat of diamond removing nearly 20 metric tons of carbon dioxide from the atmosphere, a new climate resilient future awaits.

STEWART COPELAND

POLICE DEAD & COMPANY FOR ORCHESTRA

Living legend Stewart Copeland is the founder and drummer of the British rock group 'The Police' who have sold over 75 million albums worldwide. Stewart is widely acclaimed as one of the greatest drummers in history. He was inducted into the Rock and Roll Hall of Fame as a member of The Police, the Modern Drummer's Hall of Fame and the Classic Drummer's Hall of Fame. Copeland was ranked in the top ten on Rolling Stone's "Greatest Drummers of All Time." He has also composed music for over 50 Hollywood movies including the Oscar winning film Wall Street. Stewart Copeland will reinterpret with an all-woman Firdaus Orchestra – The Police's biggest hits such as 'Roxanne', 'Every Breath You Take' and 'Message in a Bottle'.

"If playing the drums and performing some of my favourite Police songs reimaged with an orchestra can help shine a light on the challenges we're all facing with climate change, then I'm all in"

RICKY KEJ

3 time GRAMMY® Award Winner, US Billboard #1 artist, United Nations Goodwill Ambassador, GQ Hero 2020, Ricky Kej is an internationally renowned Indian Music Composer and Environmentalist. Ricky has performed at prestigious venues in over 35 countries, including United Nations, New York and Geneva. His past repertoire includes 21 studio albums released internationally, over 3,500 TV and radio commercials and 7 feature films. Ricky also scored music for Cricket World Cup 2011 Opening Ceremony in Dhaka-Bangladesh. Recipient of the United Nations Global Humanitarian Artist, the prestigious Ban Ki-Moon Award and the Outstanding Musical and Humanitarian Achievement awards, a chapter on Ricky's life and musical journey is taught in the 7th grade textbooks in India.

"It is time to heal a world in dissonance and climate despair, with the resonance of music that beats in every heart transcending geopolitical boundaries"

TRAILBLAZING FIRDAUS ORCHESTRA

Under the leadership of Her Excellency Reem Al Hashimy, UAE Minister of State for International Cooperation and Director General Expo City Dubai, the Firdaus Orchestra, an initiative of Expo City Dubai, was brought together with a goal to develop the musical community in Dubai and the UAE. Mentored by Oscar Winning composer A.R. Rahman and conducted by Monica Woodman, this all women ensemble of professional musicians come together from over 26 countries set a foundation for a multi-cultural orchestral culture in the Middle East.

CONDUCTOR
MONICA WOODMAN

As Firdaus Orchestra stepped into its second season, Monica joined the journey of the path breaking ensemble and is breaking new ground by bringing to the world the vision of Firdaus Orchestra and its mentor A.R. Rahman across musical genres staying true to classical music while balancing the needs to be contemporary and rooted.

CLIMATE THEME SONG ANURADHA JUJU

Anuradha Juju Palakurthi organized the groundbreaking Hollywood-Bollywood concert in July 2020, streamed on CNN Live, which raised funds for 10 million vaccinations for India. The featured artists included Sting, Liam Neeson, Shabana Azmi, Katrina Kaif, and many more. Anuradha was the winner of Radio Mirchi's Song of the Year in 2020 for "Jaan Meri," making her the first US nominee to clinch the honor, akin to an Indian Grammy. She was featured alongside Bappi Lahiri and Vishal Shekhar on the Filmfare award-winning show, Times of Music.

Juju Productions crafted the theme song *Chal Phir Sajaayein* for the Resonance Climate concert in Dubai. It was recorded with the 80-piece Royal Philharmonic Orchestra at the iconic Abbey Road Studios, London. The lyrics were created by Neelesh Misra and was composed by Ricky Kej with George Jacob as executive producer.

ecosynthesis our future

"Environment Education is potential set in motion. The vision for BayEcotarium is exceptional and will accelerate a generational movement for our Blue Marble."

Dr. JILL BIDEN

First Lady of the United States

"We envision a landmark environmental edifice dedicated to climate literacy and ocean conservation. The BayEcotarium is our future and the future is now. BE the movement™"

THE BAY INSTITUTE

The Bay Institute (TBI) is the policy, research and advocacy arm of Bay.org. TBI's scientists and policy experts work to protect the San Francisco Bay estuary's unique fish and wildlife species; restore the habitats and processes that support a healthy ecosystem; promote sustainable water and land management practices; and measure how well the ecosystem - and management efforts to protect it - is doing. To achieve these goals, TBI conducts technical analyses; engages in regulatory, legislative and voluntary decision-making processes; and educates media, decision-makers and the public on key issues.

SECURING NEW BAY-DELTA WATER QUALITY STANDARDS

State and federal water quality standards are the most effective and comprehensive regulations available to protect the Bay-Delta ecosystem, and updating those decades-old standards is TBI's top priority. In 2023, TBI staff analyzed thousands of pages of draft documents describing the state's new proposed Phase 2 standards (covering Sacramento River flows, Delta hydrodynamics, and flow to San Francisco Bay) and testified before state regulators on how those standards should be improved to ensure sufficient freshwater flow to the Bay in order to safeguard the estuary ecosystem. We also analyzed alternative

"Voluntary Agreements" proposed by water users and the Newsom Administration that would substitute habitat for flow – and not much habitat, either – and showed how these proposals would utterly fail to prevent the collapse of the Bay-Delta ecosystem or comply with the law. In the meantime, TBI staff also worked with our litigation team to prepare for court hearings on our legal challenge to Phase 1 of the standards update, covering San Joaquin basin flow to the Delta. Finally, we also fought relaxations of the existing, inadequate standards in the early months of 2023, which were ultimately rescinded.

Black-necked Stilt

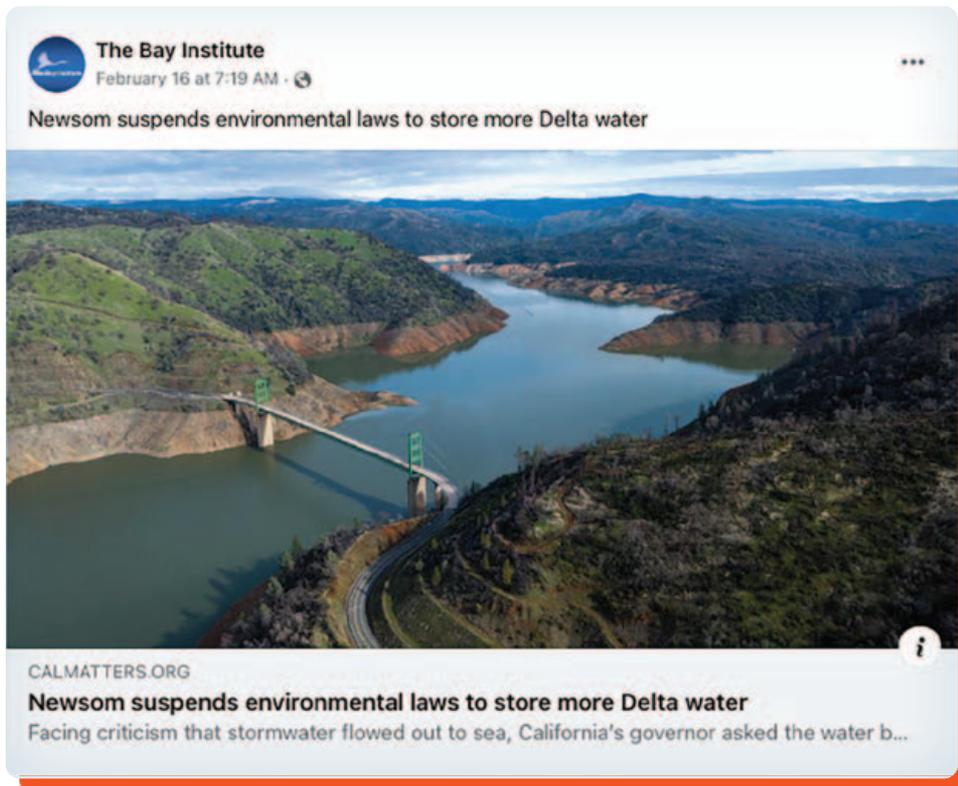

THE BAY INSTITUTE

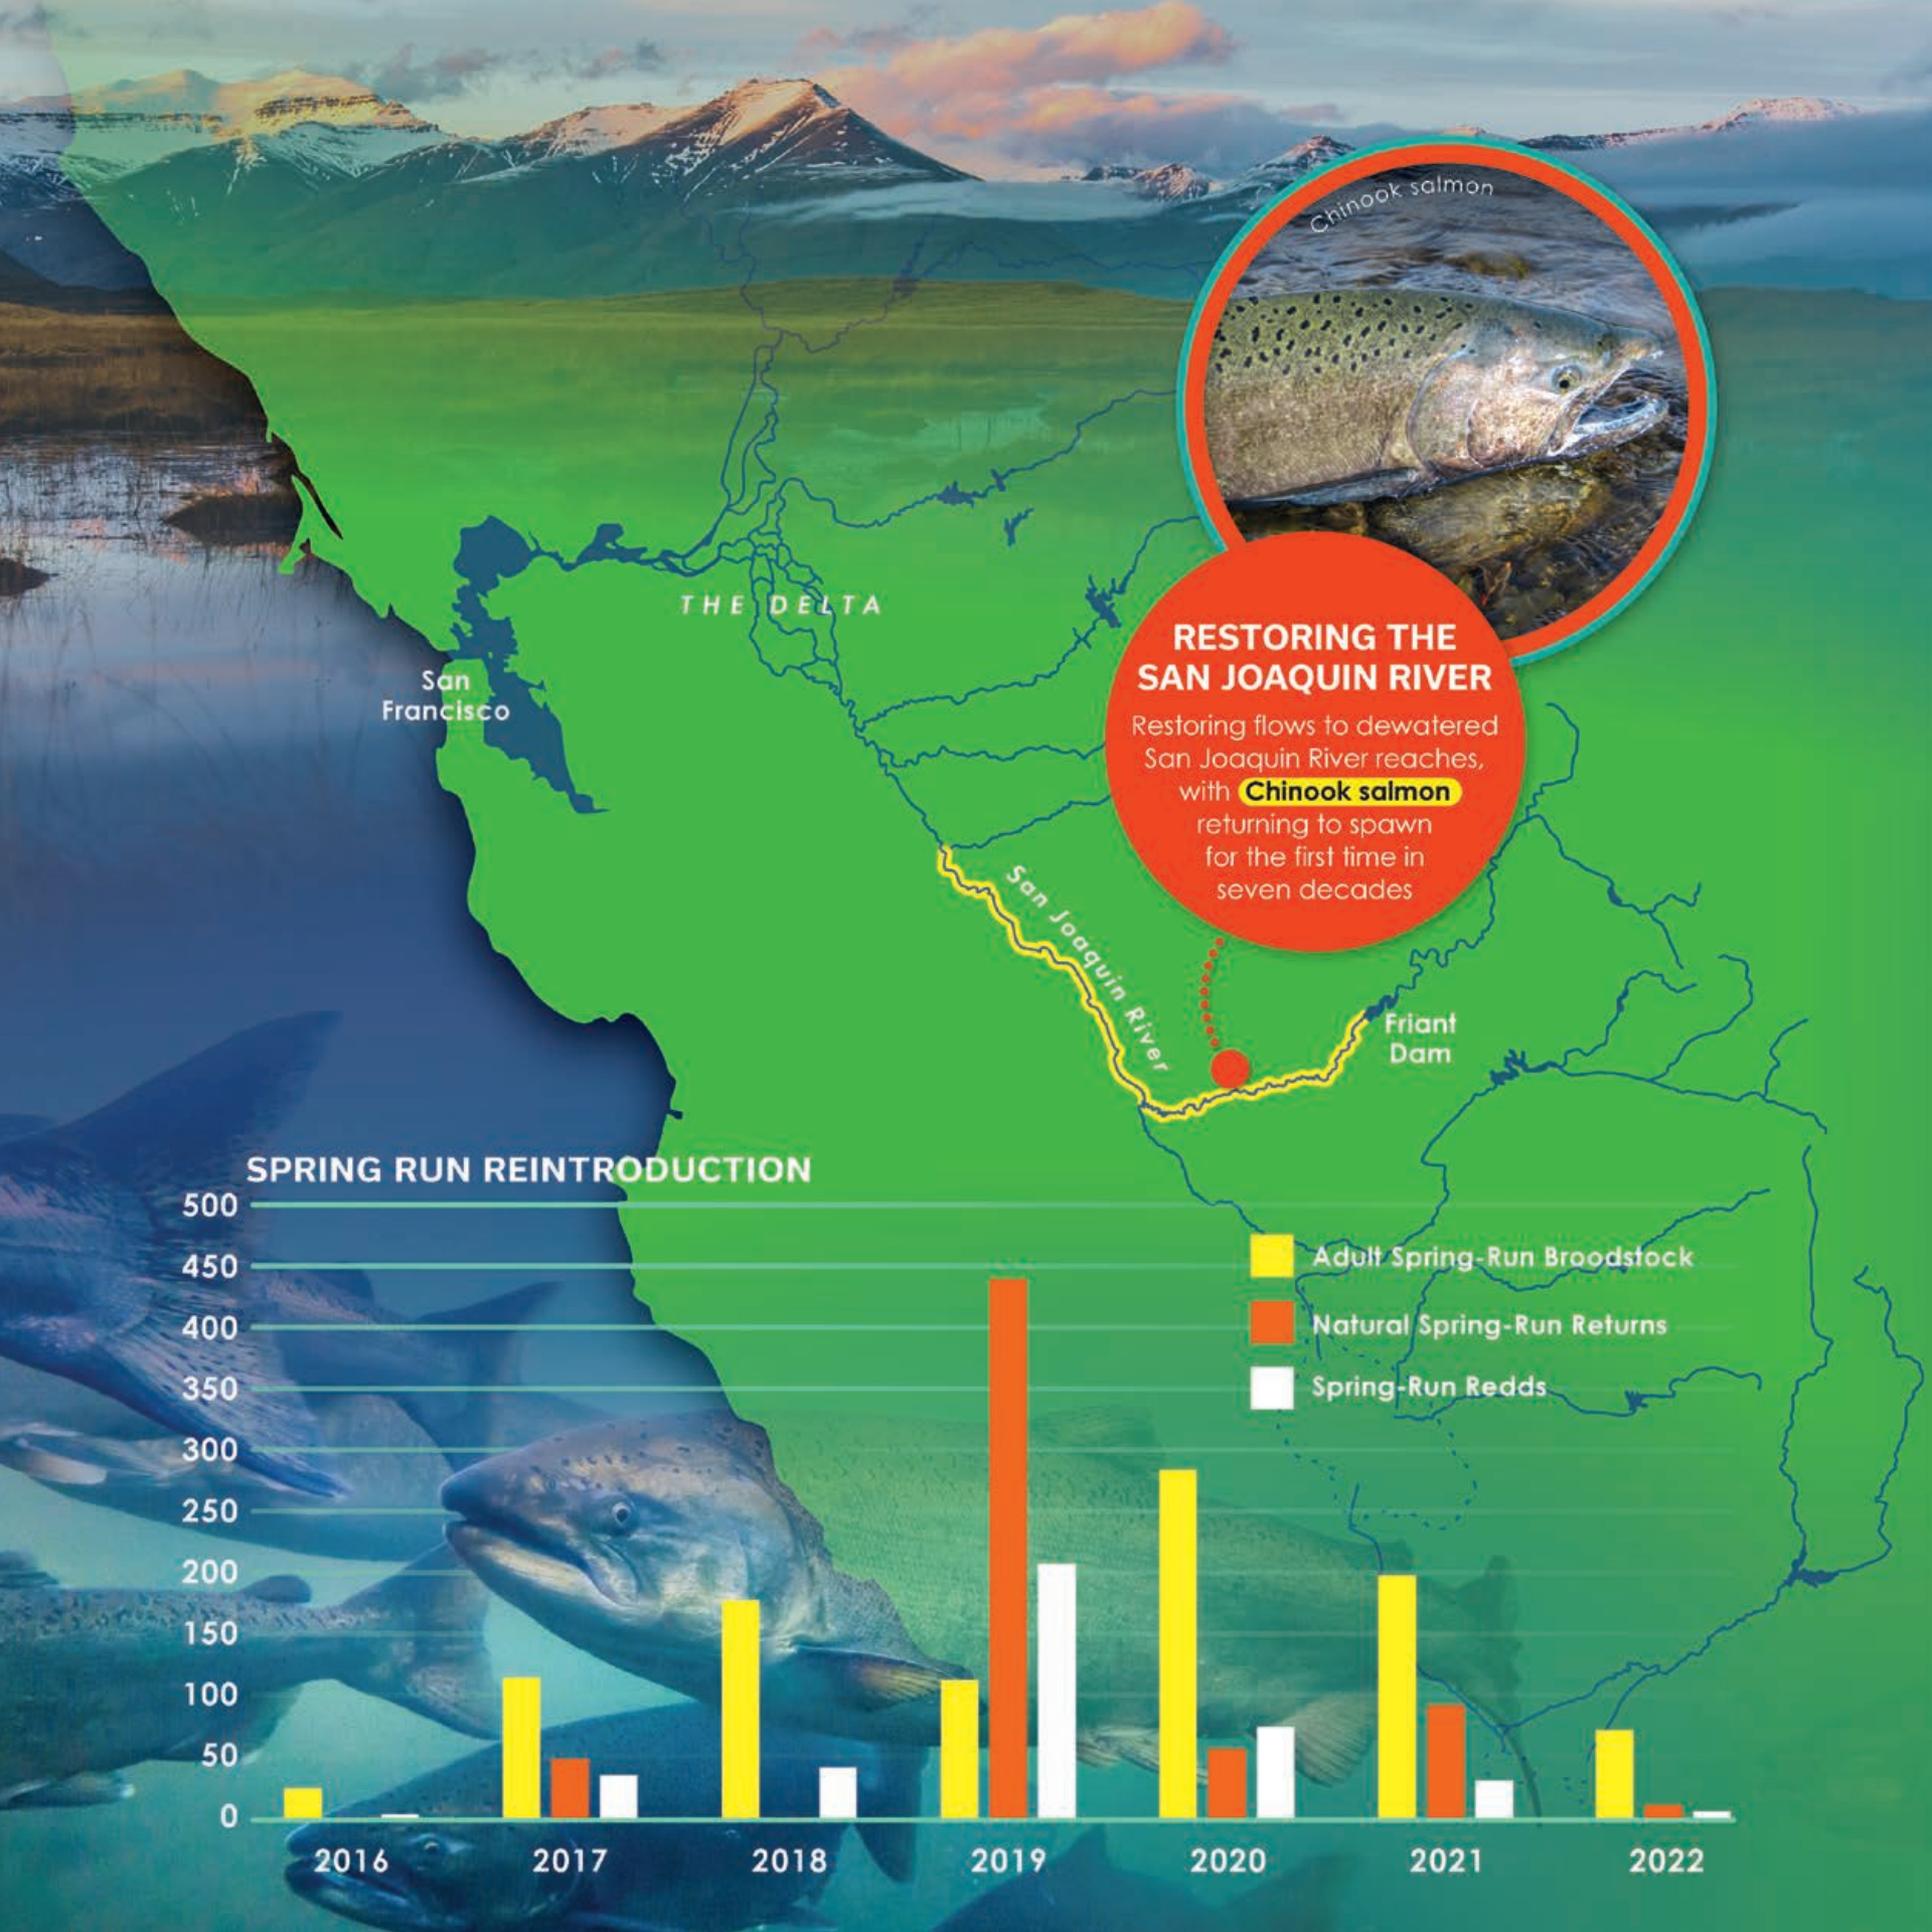

NEW BAY-DELTA WATER QUALITY STANDARDS

Federal and state endangered species requirements are the last line of defense to prevent extinction of the Bay-Delta's unique native fish and wildlife. Having fought implementation of the weak requirements for smelt and salmonid protection adopted by the Trump Administration and promoted the effort to revisit those requirements by the Biden Administration, in 2023 TBI worked with the US Bureau of Reclamation to develop and model more protective endangered species protections to govern operation of the state and federal water projects, which will be considered for adoption in 2024. Working with a consortium of government agencies, water districts, and other parties, we also embarked on the last phases of two multi-year Strategic Decision Model processes to develop and model new management regimes to recover populations of smelt and salmonids to healthy levels, with final results due in 2024. Finally, we and our partner organizations petitioned the state and federal governments to list white sturgeon as an endangered species – yet another victim of poor water management practices in California.

RESTORING THE SAN JOAQUIN RIVER

The multi-year effort to restore flows and fisheries to the once dewatered San Joaquin represents one of the nation's most ambitious restoration initiatives. In 2023, TBI, one of the leaders of the effort, worked to secure changes in water operations to ensure lower instream temperatures to protect spawning conditions for salmonids; analyzed proposed plans to construct and operate new bypass facilities for migrating fish; reviewed draft groundwater management plans that would affect San Joaquin flows; produced an updated version of the "River Killers" video documenting how the San Joaquin Exchange Contractors adversely impact the river ecosystem; and hired a new San Joaquin Valley restoration coordinator to promote additional environmental and water management measures to complement the work of the restoration program.

THE DELTA

San Joaquin River

Friant Dam

SPRING RUN REINTRODUCTION

THE BAY INSTITUTE

STOPPING ENVIRONMENTALLY HARMFUL PROJECTS

Instead of turbo-charging efforts to reduce reliance on water supplies exported from one part of California to another, water users and the Newsom Administration have been aggressively pushing new dams and conveyance systems. One of the most significant is the proposed \$5+ billion Sites Reservoir on the west side of the Sacramento Valley. In 2023 TBI lodged a formal protest of the water rights application for the Sites project, detailing numerous potential adverse effects of reducing Sacramento River and Delta flows on endangered species and habitats; we are gearing for a full water rights hearing before the State Water Board in 2024.

REBUILDING STAFF CAPACITY

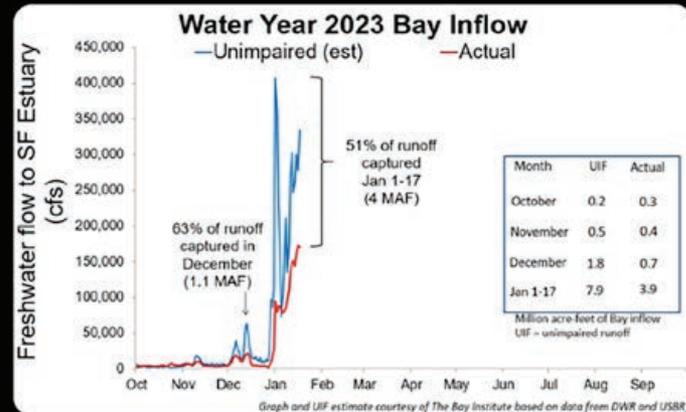

COVID-19 created enormous challenges for everyone, and nonprofit advocacy was no exception, with staffing and budgets taking big hits. But in 2023 TBI began the process of rebuilding staff capacity, hiring a new San Joaquin Valley restoration coordinator and three new program associates and beginning the search to fill the vacant Lead Scientist position. These additions are helping to ensure that TBI not only pursues its critical advocacy efforts but supports work on important projects like the Atlas of Water Use and Water Equity, now due for publication in 2024.

California Brown Pelican

The Bay Institute's analysis helped address the flood of misinformation and hypocrisy regarding early January #CAwater management, documented in this blog.

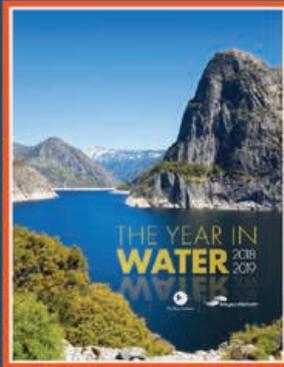

SF Baykeeper @SFBaykeeper · 6h

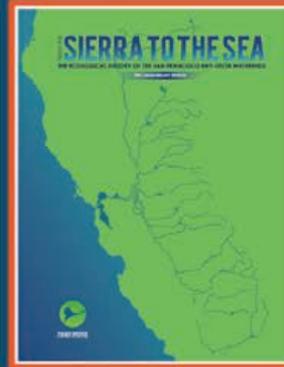

There's been a flood of misinformation about CA water in recent weeks -- and this misinformation undermines progress, constructive dialogue & trust in solving the state's water challenges, as @NRDC's Doug Obegi writes: nrdc.org/experts/doug-o-... #CAWater

BAY MODEL ALLIANCE

Bay Model Alliance with U.S. Army Corps of Engineers, continues to bring about a stronger collaboration between the two institutions. An international forum was held at the Bay Model Visitor Center jointly with the UC Berkeley Haas School of Management. With structure issues impacting the sea wall under the San Francisco Embarcadero, the opportunity of enhancing community awareness has become a necessity which will be addressed through a pop-up exhibit in the coming year. The venue will also be utilized to stage film & lecture series, traveling exhibits, book signing events, and innovation forums in 2023.

Inside the Bay Model Visitor Center is one of the most fascinating scientific tools in the world: a working hydraulic model of San Francisco Bay and the Sacramento-San Joaquin River Delta systems that simulates tides, currents, and sediment movement the Bay Model is used by scientists and engineers.

What makes the model special is that its pipes and hydraulics make it a real simulation of the water environment of San Francisco Bay and the Delta. The analog model is used to simulate the effects of everything from oil spills, upstream dams, and water diversions to floods caused by global warming. The

1.

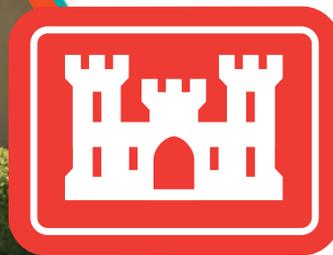

Bay Model Visitor Center provides a variety of public events and educational programs each month.

The location provides a stunning venue for special events and presentations. Tours are available for groups with advanced reservations and can be tailored to the technical sophistication of the group. The Corps of Engineers also makes the Visitor Center available to scientific and educational groups for meetings and seminars. As part of the alliance, BayEcotarium assists in retail and merchandise.

2. The Bay Model in Sausalito is the single largest working hydraulic indoor model in the United states.

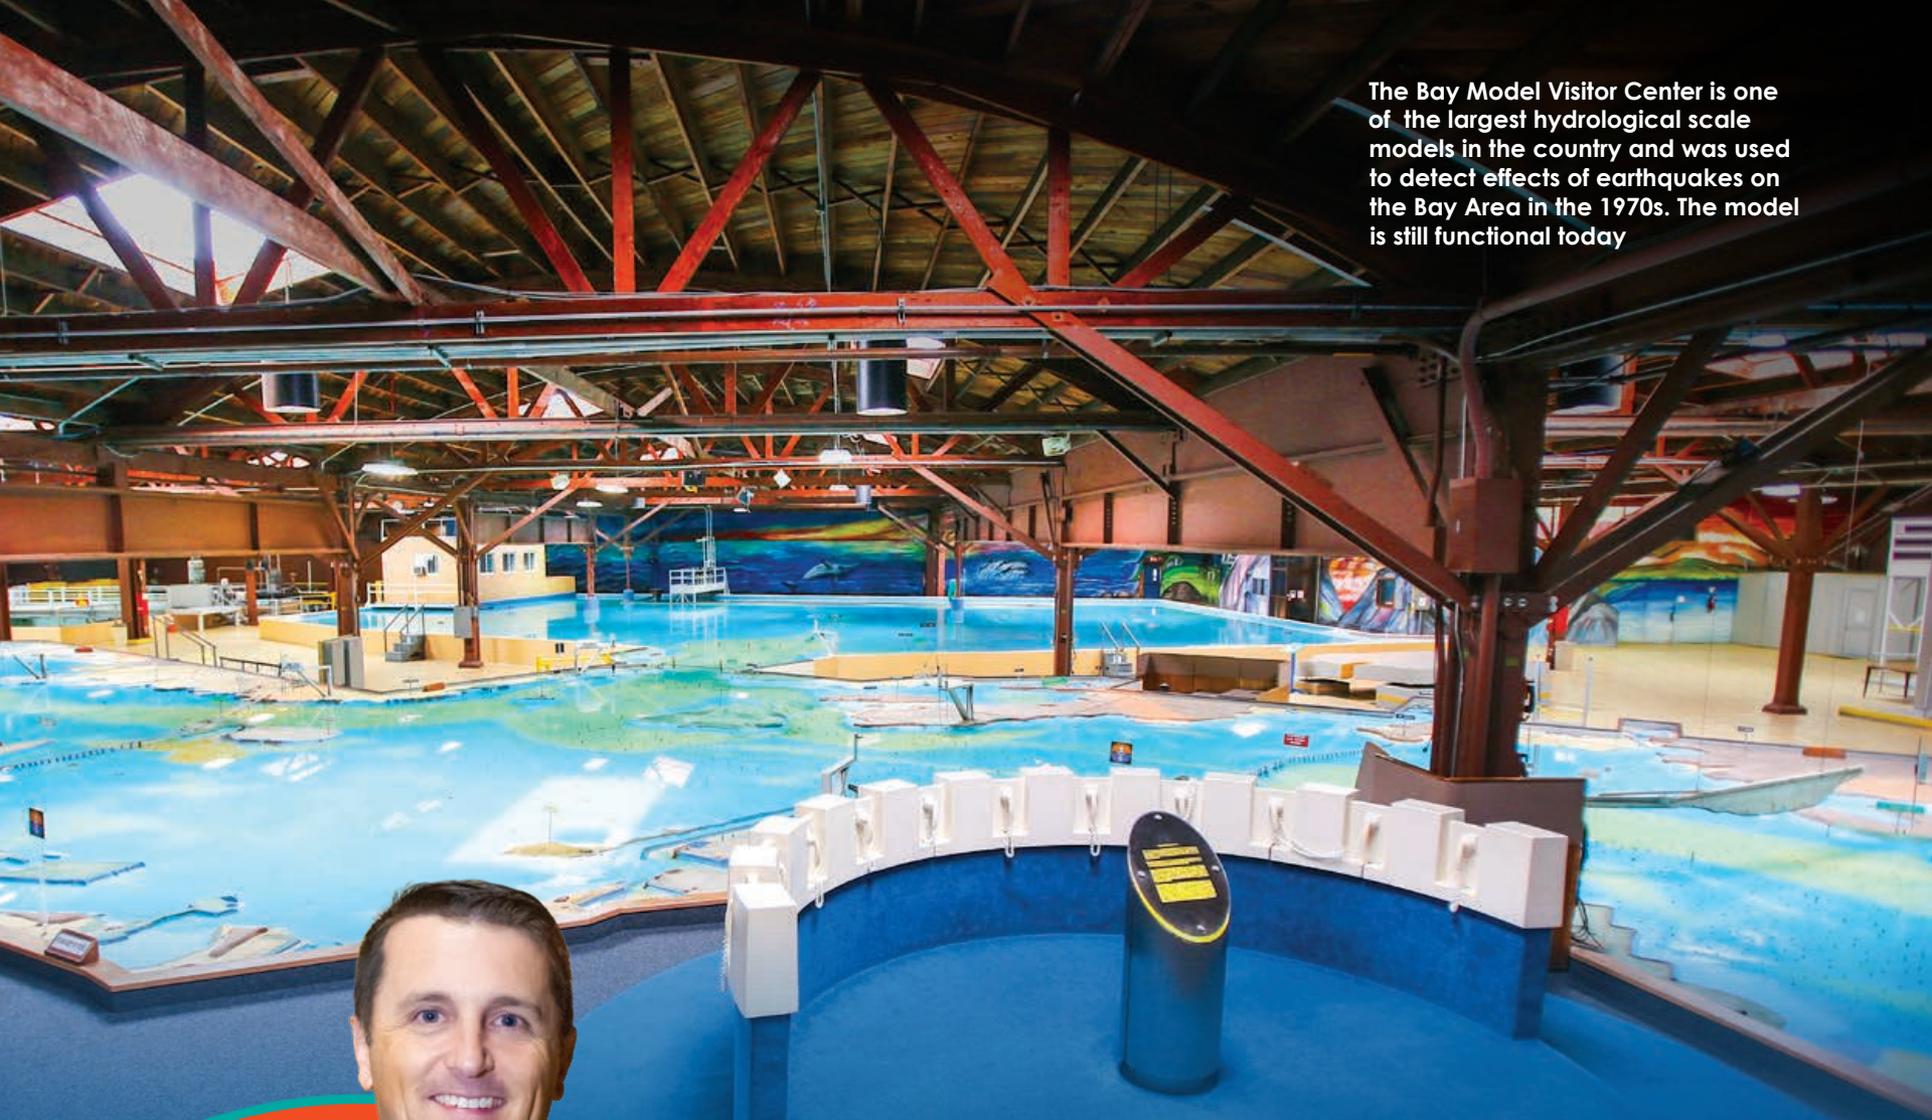

2.

®

The Bay Model Visitor Center is one of the largest hydrological scale models in the country and was used to detect effects of earthquakes on the Bay Area in the 1970s. The model is still functional today

Lt. Col. Kevin P. Arnett

BAY MODEL BIDS FAREWELL TO LT. COL. ARNETT

At a military ceremony at the Bay Model Visitor Center (operated under the Bay Model Alliance with Aquarium of the Bay),

Lt. Col. Kevin P. Arnett relinquished command of the district he has led since 2021. LTC Timothy W. Shebesta assumed command after having most recently served as Professor of Military Science at his alma mater, Marquette University Army ROTC. Lt. Col. Shebesta holds a bachelor's degree in Civil Engineering, a master's from the Missouri University of Science and Technology, and a master's degree in Urban and Regional Planning from the University of Minnesota.

His previous assignments include commander, Headquarters Company of the Special Troops Battalion, 4th Brigade Combat Team, 1st Armored Division during a third deployment to Taji, Iraq. The Corps' San Francisco District has served the Bay Area since 1866, providing support for 22 federal shipping channels and the region's \$68 billion annual maritime industry, and is the federal agency responsible for keeping the Bay's navigation channels free of debris.

EcoXpeditions provides a truly once-in-a-lifetime experience of adventure travel and conservation driven immersive engagement through special curated trips around the world.

SUSTAINABLE TOURS

Aligned with NAPA Green, the Sustainable Tours focus is on bio-dynamic farming at local wineries and to provide educational insights into organic carbon reducing processes that impact the growth cycle, from seeding, to harvesting, to processing, to bottling, to transportation, and retail.

With an all-electric bus, tours depart from the Aquarium of the Bay in San Francisco and bring your group to sustainable Sonoma wineries for the day. During the expedition, the group stops in historic Sonoma Square for meals, shopping, and exploration. Highly experienced drivers provide an insightful narrative during the journey.

Beautiful designer merchandise including tote bags, T shirts and water bottles are part of the official accessory collection designed by Studio Aqua at the Aquarium Eco-Store.

Sip Sustainably in Sonoma!

Prepare yourself for an unforgettable wine and distillery experience departing from Aquarium of the Bay at world famous PIER 39. Visit a family-owned sustainable winery, taking you through the vineyards and the winemaking process, finishing your tour and tasting in the caves where their wines are stored. Learn about sustainable wine-making practices including limiting synthetic chemicals, dry farming and deficit irrigation, native yeast utilization, and natural wine cooling. Head up to Sonoma Plaza for lunch at an organic restaurant who sources their products from local vendors. Spend some time shopping in the Plaza and complete your experience at a family-owned organic distillery offering a special experience to complete your day.
