

# MIDDLE SCHOOL EDUCATION PROGRAMS

Bay Ecotarium provides NGSS-aligned environmental science education programs at multiple locations in San Francisco. **See our program options below.**

## Aquarium of the Bay Programs

■ **Climate (R)evolution:** Explore Aquarium of the Bay and delve into scientific practices on an Aquarium Educator-led Exploration Tour. On this tour, relive the evolutionary history of the animals at the aquarium, exploring the dynamics of their evolution and how they are adapting to a changing climate.

■ **Discover the Bay Hybrid Ferry Program:** Led by an expert team of Aquarium of the Bay Educators, this program provides an immersive learning experience of San Francisco Bay from on-board Alcatraz Cruises' Hybrid Ferry. Hands-on activities focus on Bay ecology, use of scientific instruments, and innovative energy saving technologies.

■ **Self-Guided Aquarium Tour:** For groups that only have a short time to visit, a self-guided Aquarium tour is the best option. Self-guided tours are flexible and give your group an awe-inspiring look at the life of San Francisco Bay.

## EcoCenter at Heron's Head Park Programs

■ **Wetlands: At Your Service:** Wetlands provide many ecosystem services—from flood control to food production—that help support human wellbeing. Delve into the story of California's wetlands while exploring the wetlands at the EcoCenter and in Heron's Head Park.
