ECOXPEDITION OVERVIEW

We have designed the EcoXpeditions as part of our global climate and ocean conservation outreach. The main focus is to provide a hands-on and immersive experience to initiatives around the world that are making a positive impact on climate resilience and ocean conservation. This has the power to change the perspectives of participants and evoke an appreciation for environmental stewardship.

EXPERIENCE

OPTIONS

We offer special curated trips that are catered towards groups of 10-14 persons. We can modify any of our existing trips for your group depending on specific needs.

We offer diving certification and or Scuba Refreshers as well as snorkeling training prior to any expedition (or in some cases, on-site).
